## TERMOSCUC<sup>®</sup> evo PIAGGIO MP3

KIT DI MONTAGGIO  
ASSEMBLY KIT

### VISTA RIEPILOGATIVA Summary view

## STEP A

**I** Stendere Termoscud® sulla sella con i nastri 2 e 3 in avanti.

**GB** Unfold Termoscud® on the scooter's seat with straps 2 and 3 forward.

## STEP B

**I** Fissare Termoscud® da entrambi i lati, utilizzando le viti in dotazione, facendole passare attraverso il foro 1.

**GB** Fasten Termoscud® on both sides, using the supplied screws, threading them through the hole in point 1.

## STEP C

**I** Fissare TermoscuJ<sup>®</sup> da entrambi i lati, utilizzando le stesse viti dello scooter (all'interno del vano ruota), facendole passare attraverso i fori sui nastri 3 e 3 bis. I nastri 3 vanno infilati, facendo una leggera pressione, tra parafanghi e carrozzeria come in figura.

**GB** Fasten TermoscuJ<sup>®</sup> on both sides, using the scooter's original screws (above the front wheels), threading them through the holes at the end of the straps 3 and 3bis. Strap 3 pass between the mudguards and the bodywork (with some effort) as in picture.

## STEP D

- I** Agganciare i moschettoni dei nastri blu 2 al bordo inferiore della carrozzeria sotto la pedana.  
ATTENZIONE: tesare correttamente, se la forza è troppo alta il velcro di sicurezza tenderà ad aprirsi. Regolarsi di conseguenza.

- GB** Fasten the hooks of the blue straps 2 to the edge of the bodywork under the footboard.  
ATTENTION: stretch properly, if the force is too high, security Velcro could open up.  
Adjust accordingly.

## NOTE

- I** Utilizzare i punti di regolazione dei nastri per adattare Termoscud® alla forma dello scooter e metterlo bene in tensione, così da evitare lo sventolio e l'entrata di spifferi.  
Tesare forte soprattutto i nastri 2 e 3.  
Infine gonfiare le camere d'aria S.G.A.S.  
Terminate le regolazioni, le porzioni di nastro libere vanno rimboccate all'interno sotto i bordi di Termoscud®.

- GB** Adjust the position of Termoscud® using the regulations of the straps to fit perfectly on the shield and pull straps tightly, specially the strap 2 and 3.  
Finally inflate S.G.A.S. tubes.  
Exceeding portions of the straps must be tucked under the Termoscud® cover to avoid flapping.

**PIAGGIO MP3**

## TERMOSCUD<sup>®</sup> evo PIAGGIO MP3

### VUE SOMMAIRE Vista resumen

## STEP A

- F** Dérouler Termoscud® sur la selle en mettant les rubans 2, 3 et 3 bis en avant.
- E** Extienda el Termoscud® sobre el asiento del scooter, de manera que las cintas 2, 3 y 3bis queden hacia delante.

## STEP B

- F** Fixer Termoscud® sur les deux côtés, à l'aide des vis (il est préférable d'utiliser les vis livrées) et les faire passer dans les trous pratiques dans Termoscud® sur les points 1.
- E** Abroche el Termoscud® a ambos lados introduciendo los tornillos incluidos en el pack de montaje primeramente en los orificios 1 de la cubierta del faldon.

## STEP C

**F** Fixer Termoscud<sup>®</sup> sur les deux côtés, à l'aide des vis du scooter a l'intérieur du logement de la roué et les faire passer dans les trous pratiques sur les ruban 3 et 3bis. Introduire les rubans 3 entre les garde-boues et la carrosserie (forcer doucement) voir photo.

**E** Abroche el Termoscud<sup>®</sup> a ambos lados, detrás de la rueda delantera, introduciendo los tornillos que incorpora el scooter en los orificios que hay en los extremos de las cintas 3 y 3bis. Las cintas 3 se colocan entre el guardabarros y el carenado, como en la imagen.

## STEP D

**F** Accrocher les crochets des rubans 2 au bord inférieur de la carrosserie sous le repose-pied.  
ATTENTION: tendre correctement, si la force est trop haute, le Velcro de sécurité aura tendance à s'ouvrir. Ajuster en conséquence.

**E** Ate los enganches de las cintas 2 por debajo del reposapiés del scooter.  
ATENCIÓN: estirar adecuadamente, si la fuerza es demasiado alta, el velcro de seguridad tenderá a abrirse. Ajuste de manera acorde.

## NOTE

**F** Utiliser les points de réglage des rubans 2 et 3 pour adapter Termoscud® à la forme du scooter et pour bien le tendre afin d'éviter qu'il flotte et que de l'air s'y glisse par les ouvertures. Tendre particulièrement bien les rubans 2 et 3.  
En conclusion, gonfler les chambres à air S.G.A.S.  
Les parties de ruban qui dépassent doivent être repliées à l'intérieur, sous les bords de Termoscud®, après avoir terminé leur réglage.

**E** Ajuste la tensión de todas las cintas para que la funda cubra bien todo el scooter y evitar que flanee y se escape aire.  
Tire especialmente de las cintas 2 y 3.  
Por último, infle las cámaras S.G.A.S.  
Las partes sobrantes de las cintas deben meterse dentro de la funda Termoscud®.
