FCC es sin duda alguna el nº 1 en la producción de embragues multi disco para moto. Proveedor de primer equipo de los mejores fabricantes de moto, **FCC** es el único fabricante de discos de embrague que tiene un control total sobre todo el proceso de producción de los materiales de fricción.

De hecho los materiales de fricción de los discos son el factor más importante en el óptimo funcionamiento del embrague. Materiales de fricción que la propia FCC desarrolla y produce directamente con el fin de que sus discos garanticen unas excelentes prestaciones y satisfagan a los clientes más exigentes.

Es gracias a la tecnología de desarrollo de los materiales de fricción, a la mejora continua de los procesos de fabricación y al desarrollo "in-house" de los equipos de producción, que **FCC** puede alcanzar unos niveles de calidad de producto inigualables para la competencia.
