

#### - Sébastien CHARPENTIER //// STUNT EVO 2. He was the first French rider to win two World Championship 600cc Supersport titles in 2005 and 2006, and Sébastien CHARPENTIER has never stopped riding. As a brand ambassador for HDNDA, he enthusiastically shares his passion for riding by hosting orientation and training days on many tracks throughout the world, even going so far as to coach the President of this Japanese brand on the track. As he approaches his fiftieth birthday, Seb keeps up his fitness with frequent bouts of road cycling, making him look "forever young" And he loves sneakers just like a kid, feverishly collecting them. He owns many rare pairs whose sometimes inestimable value hasn't stopped him from wearing them on an everyday basis. Seb takes care of his appearance, out on the town and when he's riding. He has a real appreciation for exceptional products and first-class equipment. And so, he has naturally chosen to wear our RFX Race, the ultimate Racing glove, for his countless days on the track, and has joined us as a FIVE ambassador. When we talked to him about the new STUNT EVO2, he became an immediate fan of the innovative concept and avant-garde look of the product. Combining a pair of bright-red STUNT EVO2s with an all-black outfit (and motorcycle) seemed like the obvious choice to him. And the results are stunning Like a pair of iconic sneakers that you wear as an outward sign of "wealth" (in the sense that it makes you look great and signals that you're a connoisseur...), the STUNT EVO2 can and should be worn

#### Couverture - Sébastien CHARPENTIER //// STUNT EVO 2.

with pride. As both a distinguished rider and a fan of urban looks, Sébastien CHARPENTIER was truly the perfect man to represent our

new, iconic style throughout these pages.

Premier pilote Français à avoir remporté deux titres de Champion du Monde 600cc Supersport en 2005 et 2006, Sébastien CHARPENTIER n'a jamais cessé de piloter. Devenu ambassadeur HDNDA, il partage avec enthousiasme sa passion du pilotage en encadrant des journées de perfectionnement sur de nombreux circuits du monde, allant jusqu'à « coacher » sur piste le président de la firme japonaise qui l'emploie. À l'approche de la cinquantaine, Seb s'entretient toujours physiquement, en pratiquant assidument le cyclisme sur route, ce qui lui assure une allure d'éternel jeune premier. Et c'est tel un gamin qu'il voue une véritable passion aux baskets et autres sneakers, qu'il collectionne frénétiquement. Il détient de nombreuses pièces rares dont la valeur, parfois inestimable, ne l'empêche pas de les porter aux pieds au quotidien. Seb soigne son apparence, à la ville comme à moto et apprécie les équipements de premier plan. C'est ainsi qu'il a choisi de porter des FIVE RFX Race, le nec plus ultra en matière de gants Racing, lors de ses innombrables journées sur circuit. Lorsqu'on lui a parlé du nouveau STUNT EVO2, il a immédiatement adhéré au concept innovant et à l'esthétique avant-gardiste du produit. Associer une paire de STUNT EVO2 rouge vif à une tenue et une moto totalement noires relevait, pour lui, de l'évidence. Le résultat est percutant. A l'image d'une paire de baskets culte que l'on arbore comme un « signe extérieur de richesse », le STUNT EVO2 peut et doit se porter avec fierté. A la fois pilote émérite et amateur de mode urbaine, Sébastien CHARPENTIER était bien l'homme idéal pour représenter notre nouveau modèle iconique dans ces pages...

TECHNICAL GLOSSARY 256

FULL COLLECTION 258

FIVE: Our name rings out loud and clear, since our mission is to protect hands (and the FIVE fingers that come with it...) during activities that require high-performance technical gloves, such as riding a two-wheeled vehicle. For over fifteen years now, we've been helping riders enhance their enjoyment at the handlebar, while protecting hands from injury in case of a fall, by equipping millions of motorcycle enthusiasts around the world. Gloves are an item designed for safety, but also for comfort.

# OUR COMMITMENT CAN BE STATED IN THREE WORDS: PROTECTION FITTING DESIGN.

PROTECTION – because your hands are essential. Imagine having to spend even a single day without using one of your hands due to an injury, even one that's not serious. The smallest activity would be truly difficult, and the discomfort would be highly distressing. Protecting your hands is crucial. We don't always think about it, but as a reflex, we tend to put our hands out in front of us if we fall. They are, therefore, particularly exposed. Our goal is to reduce the risk of specific injuries related to motorcycle riding.

FITTING – because gloves form the link between you and your motorcycle. To truly savor piloting your motorcycle, this connection should be seamless, allowing for perfect responsiveness each time you touch the controls, whether you're accelerating, braking, or changing direction. Feeling every move at the controls (and, by extension, every movement of your motorcycle) is essential. It's even further proof of safety. And this should happen with a certain amount of comfort. Our desire is clearly to enhance the enjoyment you feel when riding your motorcycle.

**DESIGN** – because we consider a functional aesthetic to be especially important. In our view, the shape of each piece that makes up a glove stems from the role it plays in its use (protection, comfort, ventilation, abrasion resistance, etc.). This is why we design and craft each element independently, without using any standard pieces, so that a FIVE glove is exclusive and distinctive. Our designs are often imitated, but never equaled! So, you might as well choose the original, FIVE.

# **OUR CRAFT,** WE ARE GLOVE SPECIALISTS.

Hands have the particular complexity of being extremely sensitive parts of the body (sensitive to cold, heat, and collisions), highly exposed in case of a fall, and replete with a number of small, fully articulated elements (bones, tendons, muscles, blood vessels). More than anything, it's through our hands that we experience one of our five senses, the sense of touch. In other words, the very least element of a glove that's badly designed or wrongly placed is immediately uncomfortable. A badly fitting glove or one that's not right for your body type or riding style can considerably diminish your riding pleasure, or even ruin what promised to be a great ride, because your attention would be focused on the discomfort rather than the beauty of the landscapes you're experiencing. A glove should therefore perfectly mold to the curves of your hand as it grips the handle bars and controls and allow for total freedom of movement of each and every joint. This is why our gloves are pre-shaped and why we take care to perfectly position protective elements, just as we do those that enable joint movement.

As you can see, you can't just design a pair of gloves like you do a piece of clothing. The glove is not just a simple extension of your jacket, contrary to what non-specialist brands may lead you to believe. In terms of gloves, the approach has to be even more technical, due to the small size of the pieces assembled, their number, and the freedom of movement of the hand that is hard to obtain, yet indispensable. Because, by definition, layering levels of fabric and protective elements can swiftly end up hindering the mobility of the hand, if real expertise isn't used. This is why we've made the choice to become THE Glove Specialist, because we believe in the virtues of specialization and expertise. It's hard to imagine how complex designing an effective, high-performance glove can be. Designing an "aesthetically pleasing" glove, like many brands do, is relatively easy. Creating a glove that's functional and both elegant, comfortable, and protective, no matter the size, and for mass production, presents a whole other challenge. This is our vocation. We're no cleverer, nor more intelligent, than general gear providers. We want to offer gloves that are far better than average, because that's all we make. We dedicate all our efforts and endless hours, day after day, with each passing month and every year, to just one product: gloves! And this is how we can keep developing our expertise and constantly improving the quality of our products.

# \* Check details and terms with our After Sale Service department

# A FIVE GLOVE FREQUENTLY OFFERS JUST THAT MUCH MORE.

Beyond the idea of comfort and perfect fit, a FIVE glove often offers so much more than competitors' gloves, if you truly look at the details. It's not necessarily obvious when you purchase them, but this makes a huge difference when you wear and use them, in terms of comfort, the level of protection, and durability. When you compare the materials that make up FIVE gloves from the rest of what's out there on the market, you'll see that, compared to products that are "supposedly comparable" (in terms of price, for example), FIVE frequently offers so much more. From authentic, full-grain leather, when competitors are offering synthetic leather...to real Carbon, when others only offer basic plastic with a carbon look...to Kevlar® lining, when other manufacturers offer no reinforced lining. And then, there's the external stitching, which offers greater comfort but is harder to make, as opposed to standard seams, etc. Our motto: offering the best possible product at the best possible price. The qualities of a FIVE glove can truly be appreciated once it's worn, even more than in-shop.

## USING THE FINEST COMPONENTS AND MATERIALS: THIS IS THE FIVE HALLMARK.

We utilize optimal technology in our products, which leads us to select renowned technical partners, such as GDRE-TEX® (weatherproof membrane), Primaloft®, 3M® Thinsulate™ (thermal lining), and Dupont de Nemours® (Kevlar®) Gütermann® (for threads that are durable, yet don't cut into the skin), and adopt their innovations for our most advanced products. For example, we were the first to use Nanofront®, an absorbent, non-slip material from Japan, on the palm of our highend motocross glove, for peerless grip.

## WE'RE NOT CONTENT TO SIMPLY DESIGN OUR PRODUCTS,

WE MAKE THEM IN OUR OWN FACTORIES.

Our technicians and colleagues are on site to make sure that each glove that emerges from our production lines is consistent with the initial guidelines set forth by our R&D department in France and our technical lab in Italy, which has developed expertise in gloves over several generations and ensures that our patterns (and our gloves) are in perfect working order. from the smallest to the very largest sizes!

Our gloves are designed to cover the hand, but they are also "hand" made, by expert workers and seamstresses. Making a glove requires a considerable number of manual steps, whether it's making pieces of the protective elements, cutting, embellishing, assembling, or sewing the elements that compose it. These workers handle the fabrics and rigid pieces and assemble them using a "plain old" sewing machine, with almost unbelievable dexterity. One of the essential aspects of the comfort and proper fit of a glove is the attention given to its assembly. At FIVE, our precision standard in terms of the stitches assembling the fingers, for example, is two times more precise than standard practices in the industry. This lower tolerance for gaps in the alignment of stitches creates an extra constraint for our workers and requires them to be particularly attentive. Nevertheless, it is absolutely essential for a perfect fit, and this is one of the keys to FIVE's expertise.

Producing in our own factories allows us to maintain perfect control over our output, including in quality management. It is precisely because our gloves are assembled by human beings, and not by robots (which would be unable to copy the movements of a seamstress), that sometimes a slight gap identified at the moment of assembly creates the need for stitching that may loosen over time. This remains an exception and affects less than 1% of our total output (0.6%, to be exact), a level well below industry averages. We are proud of this low rate (zero errors simply does not exist) and take responsibility for it, to the advantage of our clients, with Premium product support through our international sales network, in order to provide total satisfaction to users of FIVE gloves. Such is the case, for example, with the RFX Race, for which we provide extra customer service and the option to have your gloves refurbished at our factory\*.

# **THE DEVELOPMENT OF FIVE GLOVES** IS BASED ON REAL FEEDBACK.

It's in collaborating with top-level riders and listening to the needs of and feedback from thousands of users throughout the world that we are able to develop ever more comfortable and protective gloves. We test our gloves under the extreme conditions offered by top-level competition, before we bring them to market. And the innovations we decide to use for racing benefits the amateur products in our range. Our official riders take part in MotoGP, Moto3, Superbike, Supersport, Endurance, Supermoto, Motocross, and Enduro world championships... They wear FIVE gloves on racetracks throughout the world and actively contribute to the evolution of our products. And so, when Michele PIRRO took a spill at over 300 kms/h at Mugello in 2018, and got up without a scratch on his hands, we were truly happy and proud to be his equipment partner. Unwittingly, he helped us study how our gloves perform in a real-life situation, well beyond any tests we carry out in a lab.In the same way, when Peter HICKMAN won the Isle of Man Tourist

Trophy (the fastest and undoubtedly most dangerous road race in the world) in 2018 - setting the average speed record at 135 mph - and 2022, when Dominique AEGERTER becomes Supersport World Champion, when Steven ODENDAAL triumphed at the 2022 Bol d'Or 24h race, when Thomas CHAREYRE was crowned 8-time Supermoto World Champion, or Steve HOLCOMBE took several Enduro World Championship titles, all of them wearing FIVE gloves, we can't help thinking that our products do, in fact, deliver the goods for the most demanding riders and athletes. Though riders are at the very heart of our product development strategy, it's also a matter of passion. Because all of us at FIVE share a love affair with motor sports. In fact, we have several former professional riders now working for us at the office, and we feel blessed to share great friendships with a number of champions, who have worn or still wear our gloves. We're always proud to see our official riders raising up their trophies and breaking out the champagne on the podium, wearing FIVE gloves, a sign that these gloves have truly done their job during the race.;) But, above all, we design and make our gloves for our clients. For you, who ride every day or simply for pleasure. Thus, we always listen to you and want to have your feedback on our products, so we can learn from experience and ensure that future generations of our gloves include all these evolutions.

Thanks to all of you, who choose to ride in FIVE gloves:)

# MAKE THE RIGHT CHOICE IN GLOVES.

To choose the right glove for you, several factors come into play. The type of motorcycle you're riding. The season you'll be using it in (Should it be ventilated? Does it need to be heated?). The average distance you'll be covering. How often you'll be using it. The level of protection and comfort required. Your budget. Though, in theory, the more a glove protects, the less comfortable it is, our entire job at FIVE is about flipping this equation and making an ultra-protective glove truly comfortable... and vice-versa. Obviously, no glove can totally protect you in case of an accident. That being said, FIVE gloves are designed to limit the risks of injury and meet CE Moto standards (with the corresponding label sewn inside, which features the Moto icon required in certain countries) on 3 different levels: CE (gloves without protective shells), CE KP1 (gloves with protective shells, providing an adequate level of protection), and CE KP2 (gloves with protective shells, providing a superior level of protection). We think that each type of motorcycle and rider deserves. a specifically adapted glove. But this hasn't stopped us from offering certain multipurpose, cross-category products. Our ambition is to offer you the widest possible selection, so you can determine the perfect type of glove for YOU.

This is the purpose of this catalogue, where you can discover our products, down to every last detail. They are categorized according to different product groups: Racing, Street, Custom, Adventure, Winter, Heating Technology, Woman, and Off-Road, from the top-level product to the most affordable one. And you'll find the summary of our collection at the end of the catalogue, to provide you with a full overview in a flash. Choosing a FIVE glove shows a certain pragmatic spirit: You want the best possible glove for riding your motorcycle, and you know that you'll find it among the 90 styles that make up our 2023 collection! THE perfect glove for you does, in fact, exist in the pages of this catalogue. Now we'll let you sit back and discover which one is yours, and, especially, encourage you to try it on at one of our many FIVE OFFICIAL DEALERS all over the planet (with whom we share our experience and real solutions to make the most of their glove selection), before you undoubtedly slip it on and enjoy a ride with it.

WHITE / RED

# RFX1 // RFX1 REPLICA

Straight out of top-level competitive racing.

Racing glove designed for the racetrack and sports. The RFX1 includes ventilated PU knuckle shells and a large carbon shell to protect the forearm. It offers all the features of a top-of-the-line glove geared towards performance. Kevlar® lining, carbon reinforcements and full grain leather for protection, Stretch Kevlar® for comfort, a protective barrier for both the palm and the top of the hand, while providing an exceptionally lightweight fit. It also features new Stretch Kevlar® and leather construction (instead of all-leather) on the thumb, for improved comfort. The palm features reinforcement in digital leather for optimal grip in wet conditions. The velcro adjusting strap is concealed beneath a protective leather flap to reduce the risk of the glove being torn off in the event of a fall. This top-of-the-range Racing glove will delight demanding riders of sports bikes, who favor control sensitivity and fit, without overlooking safety. Available in standard and replica versions.

- Full-grain cowhide construction (topside) for durability / Full-grain goatskin (palm) for suppleness
- Ventilated TPU metacarpal-knuckle protective shells
- 83. Protective Carbon palm slider shell
- 84. Palm reinforcement in digital leather
- Thenar muscle (palm) reinforcement with a SuperFabric® patch
- 86. Internal Keylar® lining
- Outer stitching on the fingers (Gütermann thread)
- 88. Carbon protective shell on the forearm

- 19. Stretch Kevlan® comfort panel (topside)
- Dual closure system, with adjustment tab underneath a protective flap
- Anti-twist accordion band between the ring and little fingers in order to limit the risk of fingers being pulled apart if you fall (a FIVE innovation)

# RFX2

# For starting out on the track.

After appearing as THE new Racing glove in 2020, the RFX2, our most affordable glove to get you started around the track, now features a new look that echoes the stylistic signatures of top-level competitive riding. It even adopts components used in more advanced styles, including the TPU cuff from the RFX Race, or the ventilated protective shells of the RFX1, and an internal Kevlar® lining, giving it all the features of a high-end glove. It offers an impressive level of performance, focused on an excellent comfort-to-protection ratio, with unequaled value for money in this category. Don't hesitate to examine every last detail of its technical specs: at a price like this, you'll definitely be convinced. In addition, its dynamic design makes it a glove that's just as beautiful to look at as it is to wear, even when you're idling. And that matters, when you love the sculpted curves of beautiful sport models.

- Full-grain goarskin and Stretch Cordura® construction (topside) / Goatskin (palm), for extreme suppleness
- Ventilated TPU protective metacarpophalangeal shells
- 83. Metacarpal reinforcements in 5mm-thick foam rubber
- 84. Synthetic leather palm reinforcement with a silicone print for grip on the handlebars
- #85. Stretch Cordura® comfort panels around the thumb and the ends of the index and middle fingers
- Internal Keylar® lining on the top of the hand and around the thumb

- External stitching on the fingers (in Gütermärin thread)
- TPU hypothenar protective shell (palm slider)
- 89. TPU protective forearm shell (identical to the one used on the RFX Race)
- Dual closure system, with an adjustment tab under a protective flap
- Anti-twist accordion band between the ring and little fingers in order to limit the risk of fingers being pulled apart if you fall (a FIVE innovation)

BLACK / WHITE

FLUO YELLOW

# RFX2 AIRFLOW

Racing spirit, top-class ventilation!

The RFX2 AIRFLOW has considerably evolved in 2021 and echoes the characteristics of the latest RFX2, making it a standard in ventilated gloves. For sport and road use, it features the ventilated topside TPU shells of the RFX1 and RFX2, but includes specific materials (perforated leather, mesh fabric) that offer optimal airflow. The mixed-material palm, in full-grain leather, perforated leather, and synthetic leather reinforcements for optimal grip, features a TPR protective slider shell on the hypothenar. Its PU cuff, a legacy of the exceptional RFX Race glove, offers extra protection on the forearm and gives the RFX2 a truly sleek and stylish look. The thumb and topside are in mesh fabric for maximum airflow. It also features gel reinforcements on the thumbs, for greater comfort at the controls. The RFX2 Airflow offers high-level protection, excellent fit, and, more than anything, effective ventilation that makes it the perfect glove for riding a sport bike in summertime.

- Perforated Full-grain goat-leather and mesh fabric construction, for ventilation (topside) / Goat leather on the palm side, for extreme suppleness
- Ventilated TPU metacarpophalangeal protective shells
- 5 mm-thick fpam rubber metacarpal reinforcements
- 84. Synthetic leather palm reinforcement with silicone print for improved handlebar grip
- 85. Honeycombed 3D mesh panels around the thumbs and ends of the index and middle fingers.
- Internal Kevlar® lining on the topside of the hand

- External stitching on the fingers (in Götermann thread)
- Hypothenar protective shell (palm slider) in TPR
- 819. Forearm protective shell in TPU (identical to the one used for the RFX Race).
- Dual closure system, with adjustment tab underneath a protective flap
- Anti-twist accordion band between the ring and little fingers in order to limit the risk of fingers being pulled apart if you fall (a FIVE innovation)

BLACK

WHITE

# RFX3

The affordable sport glove.

A multi-purpose sport and road glove, the RFX3 shows off its high-performance side by adopting the ventilated protective shells of the high-end Racing styles. Its full-grain leather construction, forearm protection, and TPR protective palm slider make it a safe bet in terms of comfort and protection. Its velcro adjusting strap concealed beneath a protective leather flap allows it to reduce the risk of the glove being torn off in the event of a fall. FIVE's real feat here lies in giving the RFX3 the main features of the best Racing gloves, at a truly reasonable price.

- Full-grain goatskin construction (topside and palm) for suppleness
- Ventilated TPU metacarpal-knuckle protective shells
- TPR palm slider hypothenar muscle protective shell
- 84. Palm reinforcement in perforated Clarino® leather
- 85. Forearm protection with leather panel and TPR logo
- 86: Leather accordion comfort panels
- BP. Dual closure system, with adjustment tab underneath a protective flap

BLACK / WHITE

BLACK / FLUO YELLOW

## RFX4 EVO

Somewhere between road and track.

The RFX4 EVO made its debut in 2022 collection and is designed for riders who put comfort over performance and are looking for all the versatility of a sport glove. or all the sportiness of a versatile glove. ) By adopting the brand-new FIVE ERGO PROTECH® ergonomic protective shell used in both our urban and trail gloves, the RFX4 EVO offers a less aggressive look than that of the RFX1, RFX2 and RFX3. Though it fits in so naturally at the controls of a sportier bike, the RFX4 EVO is also right for riding a powerful scooter or a roadster, and thus, offers a more reassuring alternative to short gloves, which are more commonly used with this type of machine. It also offers the extra protection typical of Racing gloves, with all the comfort often found in less exclusive gloves. The RFX4 EVO is well and truly the perfect compromise between our road gloves and gloves for pure racing use.

- Full-grain goat leather construction (topside and palm) for suppleness
- Semi-soft ERGO PROTECH® metacarpophalangeal protective shell
- ERGO PROTECH® soft TPR hypothenar protective shell (palm slider)
- 84. PU palm reinforcement for better grip on the handlebars
- 85. Forearm protection featuring a leather panel and 30 TPR logo
- Dual closure system with a velcro tab and a cuff adjustment tab
- B.P. Comfort gussets on the wrist and fingers
- Touch Screen" system for handling touchscreen devices

BLACK / WHITE

BLACK/WHITE/RED

# RFX SPORT

Your daily Sport.

Launched in 2020, the RFX Sport is now the entry-level style for our Racing range. It's more focused on comfort than performance, and is designed for riders looking for an effective, accessible glove for everyday riding on a sport or road bike. It offers a more-than-satisfactory level of protection and comfort for road use, with its goatskin construction, main one-piece PVC shell concealed underneath the leather (perforated for an energetic look), multiple foam reinforcements, and TPR hypothenar protective shell. It deliberately retains a relatively classic look for a sport glove, so it can be your perfectly discreet companion from the road to the office.

- Full-grain goatskin construction (topside and palm) for extreme suppleness.
- PVC metacarpo-phalangeal protective shells under leather (perforated for a great look)
- 83. Stretch comfort gusset over the wrists
- 84. External stitching on the fingers
- Palm and ring and little finger reinforcements in synthetic leather
- TPR hypothenar protective shell (palm slider)
- Dual closure system with an adjustment tab under a protective flap
- Forearm protection from foam reinforcement under leather
- Index, middle, little finger and thumb knuckle protection from foam under leather
- 18. Reflective night-time visibility panel

BLACK / FLUO YELLOW

# RFX SPORT AIRFLOW

More air to play sport.

Launched in 2020, the RFX Sport is now the entry-level style for our Racing range. Here we find it in its ventilated AIRFLOW version, made for summertime riding. It's more focused on comfort than performance, and is designed for riders looking for an effective, accessible glove for everyday riding on a sport or road bike when temperatures start to rise. It offers a more-than-satisfactory level of protection and comfort for road use, with its goatskin construction, main one-piece PVC shell concealed underneath the leather, multiple foam reinforcements, and TPR hypothenar protective shell. It deliberately retains a relatively classic look for a sport glove, so it can be your perfectly discreet companion from the road to the office.

- Full-grain goatskin construction (topside and palm) for extreme suppleness (perforated for ventilation) and vented mesh fabric
- 82. PVC metacarpo-phalangeal protective shells under leather
- 83. Stretch comfort gusset over the wrists
- 84. External stitching on the fingers
- Palm and ring and little finger reinforcements in synthetic leather
- 86. TPR hypothenar protective shell (palm slider)

- Dual closure system with an adjustment tab under a protective flap
- 88. Forearm protection from foam reinforcement under leather
- Index, middle, little finger and thumb knuckle protection from foam under leather
- 18. Reflective night-time visibility panel

# **RFX**<sup>WP</sup>

## The high-performance weatherproof glove.

Designed to satisfy sport-bike aficionados who love to

feel the road even when it rains, the RFX WP made a

bold entrance into our Racing range. It's made for the

open road, but is perfect for anyone who loves sport-in-

spired equipment. You're sure to fall for this glove,

which looks a lot like the ones our official pro riders use,

with exceptional control sensitivity and other qualities

that make it enjoyable for everyday wear. So, it inherits

details inspired by competitive riding, and at the same

time, features refined details usually reserved for pure-

ly road, or even urban, riding. Its goat-leather construc-

tion with outside seaming, a cuff that emulates the RFX

Race style, and its ERGO PROTECH® one-piece carbon

shell, all make it look truly sporty. The 5\_DRYTECH\*\*

breathable, weatherproof membrane creates a barrier

against the rain, and the anti-slip digital PU reinforce-

ments and stretch, water-repellent fabric insets make

it effective and fun to wear, even when the weather's

bad. The Touch Screen™ and Clear Vision Pad™ systems

will make it your faithful companion on everyday rides.

It's deliberately uninsulated, so you can focus on per-

formance, perfect for when temperatures are mild.

The RFX WP now proudly takes its place within the

FIVE collection as the sportiest of all our weatherproof

gloves. It'll be your go-to glove as soon as the skies look

threatening...

- 81. Topside: Full-grain goat-leather and Cat Eyele fabric construction / Palm: Goat leather for extreme suppleness / PU digital palm and thumb reinforcement for grip / Water-repellent stretch fabric
- S\_DRYTECH\*\* breathable, weatherproof membrane, partially bonded to the glove on the palm side
- Semi-rigid TPU Racing Cuff, emulating. the RFX Race style.
- ERGO PROTECH® one-piece carbon protective shell
- Mini-protective shells in soft TPE and comfort gussets on the index and middle fingers
- Hypothenar protective shell (palm slider) in TPR
- 3 mm foam reinforcement underneath the leather at the thenar and on the thumbs
- Dutside seaming on the fingers
- Reflective elements on the index and middle fingers and cuff
- Dual closure system on the wrist and adjustable cuff with a veloro tab
- Internal Bemberg" comfort lining
- Anti-twist accordion band between the ring and little fingers so your fingers don't get pulled apart if you fall (a FIVE innovation)
- Clear Vision Pad® visor cleaning system on the left-hand side
- Touch Screen's system for handling electronic devices (index finger)

# SPORT<sup>WP</sup>

The weatherproof glove with a sporty look.

Even though its name is already a major hint, the SPORT WP isn't just for piloting sport machines. Very simply, it has a sporty look, and will be perfect for those looking to ride full-on, whether it's a sport bike, roadster, touring bike, or something else. Weatherproof, with its 5\_DRYTECH™ membrane, and featuring lightweight. Thinsulate™ 70g thermal insulation, it's designed for mid-season riding, when the chance of rain is increasing, and temperatures are yet to reach extreme levels. Its super-comfortable construction, made in a water-resistant stretch fabric for the topside and a goat-skin and PU GRIP-reinforced palm, its sleeve equipped with a protective Soft TPR shell and its metacarpal protective shell with a visible carbon look, give the SPORT WP all its personality.

- Water-resistant stretch fabric construction (topside) for weather resistance and comfort / Full-grain goatskin (palm) for suppleness
- 82. 5\_DRYTECH\* weatherproof membrane
- Thinsulate<sup>ne</sup> 70g lightweight thermal insulation
- 84. Bemberg<sup>w</sup> internal comfort lining
- One-piece PU metacarpal phalangeal protective shell with a visible carbon look
- 86. Hypothenar protective shell (palm slider) in TPR
- 87. Forearm protection with a sleeve and 30 TPR shell
- 88. PU CRIP palm reinforcement
- Reflective print on the fingers and cuffs for night-time visibility
- Racing glove-inspired dual closure system
- Touch Screen" system (on index finger) for handling touchscreens without removing gloves

## SF1

As good on track as on the street. Supermoto World Champion.

The SFI can be considered the short racing glove par excellence. Perfect for sport, roadster, and supermoto riding. Made famous by its 14 Supermoto World Champion titles (8 at the hands of Thomas CHAREYRE), the SFI has been totally redesigned in 2018, creating a brand-new style that's even more efficient. Designed for high-performance connoisseurs looking for a level of protection equivalent to that found on high-end racing gloves, without the bulk, it promises optimal protection of the ulna. With its palm that includes a leather digital reinforcement, it offers optimal grip under all circumstances. With full-grain leather, Kevlar® lining. Carbon reinforcements and a SuperFabric® patch on the palm, Stretch Kevlar® for comfort, the new SFI is protective both on the inside and on the topside of the hand. Simply THE benchmark style in its category.

### **TECHNICAL** FEATURES

- Full-grain cowhide construction (topside) for durability/ Full-grain goatskin (palm) for suppleness
- Ventilated TPU metacarpal-knuckle protective shells
- 83. Protective Carbon palm slider shell
- 8<. Palm reinforcement in digital leather
- 85. Thenar muscle (palm) reinforcement with a SuperFabric® patch
- 86. Internal Keylar® lining
- 87. Duter stitching on the fingers
- 88. Carbon protective shell on the forearm
- 89. Stretch Kevlar® comfort paniel (topside)
- Closure system with velcro tab and leather on/off pull tab

 Anti-twist accordion band between the ring and little fingers in order to limit the risk of fingers being pulled apart if you fall (a FIVE innovation)

# SF2

## Compact and sporty.

A short sport glove, the SF2 takes up the superior SF1 concept and makes it even more multi-purpose and affordable. Perfect for sport bike, roadster, and supermoto riding. Lightweight and compact, its ventilated PU shells offer both protection and airflow. Built-in protective padding (underneath the leather) on outer knuckles. Perforated full-grain leather and stretch Cordura® construction with accordion-style gussets. Palm and thumb reinforcement in synthetic leather for better grip. Airprene® wristband for excellent hold. TPR and velcro closure. Short leather cuff with built-in memory-foam reinforcement underneath the leather at the forearm level. It provides top-level performance on any type of machine, and features a clearly sporty look that won't go unnoticed.

- Full-grain cowhide construction (topside) for durability / Full-grain goatskin (palm) for suppleness
- Ventilated TPU metacarpal-knuckle protective shells
- 83. Protective TPR palm slider shell
- 84. Palm reinforcement in perforated synthetic leather
- Thenar muscle (palm) reinforcement with foam patch underneath the leather
- 86. Outer stitching on the fingers.
- 87. Forearm protection with foam patch underneath the leather
- 88. Stretch Condura® comfort panel
- Closure system with TPR tab velcro and leather on/off pull tab

GREY / FLUO YELLOW

BLACK

# SF3

## The ultra comfortable short sporty glove.

The SF3 is a short, urban sport glove that's all about extreme suppleness, effective ventilation, and top-level protection... all with a bold FIVE identity. On the topside: leather construction and ventilated PU Racing protective shell on the metacarpals. Ventilated leather
on the index and middle fingers. Ventilated synthetic leather reinforcement on the thumb.
The inside of the palm is in full-grain leather with synthetic leather reinforcements and a
TPR shell. Several textile elements (3D Airmesh, 4-way Spandex<sup>20</sup> on the thumb, ring finger,
and little finger, Lycra® fourchettes, Airprene® cuff) make it exceptionally comfortable.
The wide FIVE logo in soft TPR combines a sporty look with protection. This style is now an
absolute must-have.

- Full-grain cowhide construction (topside) for durability and Airmesh fabric for ventilation / Full-grain goatskin (palm) for suppleness
- Ventilated TPU metacarpal-knuckle protective shells
- 83. Protective TPR palm slider shell
- 84. Palm reinforcement in perforated synthetic leather
- 85. Airprene® cuff
- 86. 4-Way Spandex\* comfort panels (topside)
- Closure system with TPR tab + velcro and on/off pull tab

# THE STUNT EVO 2

Inspired by helmet technology, the concept invented by Five is now reinvented.

Behind the creation of the STUNT by FIVE was a powerful idea: offering a short, sport-style glove for riding in urban & suburban zones that would be as protective as a track glove, and as lightweight and comfortable as a motocross glove. The STUNT succeeded in fulfilling this mission by adopting stretch elements in its topside construction and featuring sleekly designed protective shells and a leather palm that included a slider-type protective shell.

Though FIVE invented the STUNT, which helped make our brand a success throughout the world, this concept was then frequently copied...but never equaled. After the original STUNT came the STUNT EVO. Now, FIVE stays a step ahead once again with the third generation of this glove, the STUNT EVO2.

# **NEW EXCLUSIVE DESIGN**Airgoprotech shells

Even more comfortable and protective than its predecessors, the STUNT EVO2 and its different iterations use the latest generation of AirgoProtech™ Performance ergonomic protective shells. Created by the Design and R&D departments at FIVE, their design is trademarked and protected. Their construction is now inspired by helmet technology, combining the benefits of a hard external shell with the advantages of soft internal elements that channel airflow.

Like the hard shell of a helmet, the rigid outer shell protects you from the impact of a fall. And the internal soft element absorbs and diffuses the energy of any impact, as the internal EPS liner on a helmet would do. Its honeycombed structure, which includes multiple openings, promotes optimal airflow (as would the holes and channels in a helmet's EPS inner liner).

On most gloves, foam of varying thickness is placed underneath the rigid plastic shells (even ventilated ones...), to make the contact zones between the glove and the hand more comfortable. What happens is that the foam tends to obstruct airflow.

No such thing is happening with the STUNT EVO2,

because its ergonomic shape and the softness of the internal AirgoProtech™ element means that no comfort foam is needed. Only a thin lining allows the air to filter through, thus ensuring a comfortable junction between the skin and the soft protective element that molds to the natural contours of the hand.

The comparison with the world of helmets goes even further, because we've also produced 3 different shell sizes to cover the various (glove) sizes we offer. It's the same as for major helmet makers, except that we've doubled down by producing 3 sizes of right-hand shells and 3 sizes of left-hand shells....)

## A 100% FULL-GRAIN LEATHER PALM for extreme suppleness

By choosing a 100% full-grain goat leather palm, renowned for its extreme suppleness, and a semi-soft, honeycombed ERGO PROTECH® palm slider, the STUNT EVO2 offers unparalleled feel on the handlebars. And thanks to its topside construction in stretch Twill Span, the second-skin effect offered by the STUNT EVO2 is simply stunning.

This glove's fit is impeccable, with its velcro tab that's integrated into the very structure of the wristband. And finally, the dual Touch Screen's system allows you to handle all your device screens without taking off your glove. Located on the thumb and index finger, it makes using your smartphone's camera function or the zoom feature of your GPS so much easier. Offered in a range of bright, solid colors, such as red and neon yellow, or a camo version, the boldest (or most fashion-conscious) riders will proudly pair it with their everyday looks, like those brand-name sneakers that everyone notices.

STUNT EVO2, STUNT EVO2 LEATHER VENTED, and STUNT EVO2 AIRFLOW are the worthy heirs to the original STUNT...but now they're entering a whole new dimension!

BLACK

# STUNT EVO 2 LEATHER

The ventilated, all-leather STUNT.

Here's a version of the STUNT EVO2 that gives pride of place to the natural, noble material that is leather. Because for some of us, there's nothing like leather for comfort and, especially, safety, the STUNT EVO2 LEATHER combines all the qualities of this traditional material for motorcycle equipment with a truly modern design, bringing to life a completely unique glove. And since we're dealing with a summertime glove, the leather is full-grain goat leather that's perforated to facilitate airflow and help perspiration evaporate. The rest of its components are exactly like those of the other STUNT EVO2 styles. It features the latest innovations from FIVE, both in terms of safety, with its AirgoProtech<sup>20</sup> shells inspired by helmet technology (see previous pages), and in comfort and ease of use (Touch Screen<sup>20</sup> on the thumb and index finger so you can handle your device screens, a velcro closure that's integrated into the structure of the wristband, etc.). We are clearly in the presence of a glove that features an innovative, unique design, all in leather, unparalleled in terms of style. The white version is, in our view, supremely elegant, likely to please the most distinguished riders. Pair it with a black outfit...without the slightest hesitation.

- 81. Perforated goat leather topside construction
- 82. Full-grain goat leather palm
- Ventilated AirgoProtech\* metacarpalknuckle protector
- 84. ERGO PROTECH® honeycombed palm slider
- 85. TPR finger protection with air intake vent
- Softshell thumb construction for optimal finesse and comfort.
- 87. Ultra-tough stretch Nylon fourchettes between the fingers.
- Ergonomic, fused neoprene wristband with integrated velcro closure
- Touch Screen\* system on the index finger and thumb
- TO CERPL

# STUNT EVO 2 LEATHER

# STUNT EVO 2

The STUNT, original version.

This is clearly the most common, new-gen iteration of the STUNT concept invented by FIVE. Its topside construction in tough stretch Twill Span fabric contributes greatly to the exceptional comfort of this iconic style. It features exceptional protection, given the second-skin feel it offers, with its AirgoProtech<sup>™</sup> shells inspired by helmet technology (see previous pages), featuring a particularly innovative design. Its 100% full-grain goat leather palm, which is both supple and durable, feels so smooth and soft to the touch...And yet, it offers excellent grip on the controls and hosts a leather reinforcement lined with an ERGO PROTECH® semi-soft, honeycombed protective shell that offers a reassuring feeling of safety, without hindering your movements in any way. With its signature look, the STUNT EVO2 offers its rider a certain kind of status: that of an avant-garde design aficionado, even offering the feeling of being truly on the cutting edge, even ahead of the curve.

- 81. Twill Span stretch topside construction
- 82. Full-grain goat leather palm
- Ventilated AirgoProtech\* metacarpalknuckle protector
- 84. ERGD PROTECH® honeycombed palm slider
- 85. TPR finger protection with air intake vent
- Softshell thumb construction for optimal finesse and comfort
- Ultra-tough stretch Nylon fourchettes between the fingers
- Ergonomic, fused neoprene wristband with integrated velcro closure
- Touch Screen\* system on the index finger and thumb
- 10. CEMPI

# STUNT EVO 2 AIRFLOW

The STUNT in a ventilated version.

This is the version of the STUNT EVO2 to use when the mercury starts rising. Its topside construction in ventilated 3D Air Mesh fabric and its perforated full-grain goat leather palm allow for optimal airflow and help perspiration evaporate, since it tends to accumulate when you ride harder than usual. Despite its highly ventilated qualities, the STUNT EVO2 Airflow still offers excellent protection with its AirgoProtech® shells inspired by helmet technology (see previous pages), and their particularly innovative design. Its palm hosts a leather reinforcement lined with an ERGO PROTECH® semi-soft, honeycombed protective shell. You clearly choose the STUNT EVO2 for its avant-garde, even futuristic design, but also, and especially, because there's nothing better for taking the controls of a roadster when the city is suffocating in the heat.

- Air Mesh honeycombed topside construction
- 82. Full-grain goat leather palm
- 83. AirgoProtech\* ventilated metacarpalknuckle protector
- 84: ERGO PROTECH® honeycombed palm slider
- 85. TPR finger protection with air intake vent.
- Softshell thumb construction for optimal finesse and comfort
- 87 Ultra-tough stretch Nylon fourchettes between the fingers
- Ergonomic, fused neoprene wristband with integrated velcro closure
- 89. Touch Screen\* system on the index finger and thumb
- 10 CEKP

## RS1

## The most advanced RS street glove.

The STREET SPORT collection is made for riders who want to combine comfort with a sporty feel for their everyday rides in the city and beyond. This is perfectly reflected in the RS range, with this new, ultra-innovative style leading the pack, the RS1. Like its cousin, the STUNT EVO2, the RS1 also uses helmet-inspired technology, which went into the making of its AirgoProtech™ Sport metacarpal-knuckle protective shell.

This glove offers softer lines matching the "sporty comfort" spirit of the RS range while highlighting the dynamic (you could even say "aero" dynamic) character of this style. The aesthetic approach may be different, but the philosophy remains the same: a hard outer shell to withstand impacts, and a soft inner element to absorb and distribute the energy of the impact, with a honeycombed structure that allows for perfect ventilation. This is all optimized using an additional vent that sends the air toward the inside of the glove. Inspired by air ducts used on Formula 1 or MotoGP brake systems, this is a signature element of the RS1 and is sure to be alluring to fans of design and aerodynamics. This soft, ergonomic internal element means we don't have to use comfort foam underneath the shells (which would obstruct airflow), as you'd find in most gloves on the market. These new shells made of 3 layered elements, the result of research by our R&D department, are making their debut exclusively within the RS1. They promise optimal safety since they cover the main joint and metacarpals. The RS1's construction cleverly combines perforated full-grain goat leather on the zones that are most exposed or prone to heavy wear, and Spandex, a durable stretch fiber, on the area that requires more flexibility. The goal here is to offer an ideal balance between comfort and protection, along with a first-rate sensation at the controls. The 100% ultra-supple goat leather palm hosts an ERGO PROTECH® semi-soft honeycombed slider, to protect the hypothenar without hindering your grip on the handlebars. The grooved neoprene outer surface of the wrist, the PullN'Ride" adjustment tab, and the TPR + Velcro flap create a perfect fit and optimal support for the glove. The RS1 also features the Touch Screen\* system on the index finger and thumb, so you can use your GPS and smartphone with ease without taking your glove off, including for the zoom and camera functions.

Comfort, safety, functionality, and ultra-innovative design...the RS1 really does tick all the boxes, but watch out: it's for the most demanding riders, first and foremost. You decide if you fall into that category...

- Perforated goat leather \* Spandex\* topside construction
- 82. Full-grain goat leather palm
- 83. AirgoProtech\* ventilated metacarpalknuckle protector, with air duct.
- 84. ERGO PROTECH® honeycombed palm slider
- 85. TPR finger protection with air intake
- Ultra-tough stretch Nylon fourchettes between the fingers
- 82. Ergonomic wrist in fused neoprene
- 88. TPR + Velcro adjustment flap
- Touch Screen\* system on the index finger and thumb

### RS-C

### The "C" in its name stands for Carbon.

Building on the success of the RS styles in the Street range, we've decided to offer a more elaborate, high-performance version of our affordable, versatile urban gloves. And so, carbon, a high-grade, technical, lightweight material, makes its appearance in this product group with the RS-C, in a superb one-piece protective shell. But this isn't the only refined detail here. The thick TPR logo that serves as protection extends into an adjustment tab in the same material and of the same thickness on the upper section, and into a leather strip in the same color on the lower section, covering the little finger, giving the RS-C its truly distinctive design. The glove's opening features the new FIVE V-Entrance's system, with its V-shaped cutout, making for easier on/off. Its topside that combines Spandex's, ventilated leather, and Airprene®, with a synthetic leather palm, make this RS-C a truly effective style for urban riding.

- #1. 4 Way Spandex\*\* construction for elasticity, and leather (topside), perforated for airflow / Synthetic leather (palm) and full grain leather reinforcements at strategic spots for durability
- 02. Leather little finger construction
- Bil. One-piece visible carbon metacarpalphalangeal and phalangeal protective shell
- 84. Hypothenar protective shell (palm slider) in TPR
- 85. Phalangeal protective mini-shells in TPR
- 86. Palm reinforcement in synthetic leather, with adhesive print.
- 87. V-Entrance\* system for easier on/off
- 88. Airprene® cuff for adjustable fit, comfort and ventilation

- 89. Lycra® finger contours
- Closure system with TPR + velcro flap and synthetic leather pull-tab
- Reflective elements on the fingers and tooside
- Touch Screen\* system (on index finger) for handling touchscreens without removing gloves.

## RS2 EVO

The same, only better.

With the RS2, FIVE makes its expertise available to all, offering an enjoyable everyday glove for all types of two-wheelers, from motorcycles to scooters. A top seller and 2017 winner of the Top Quality Prize from influential Moto Magazine in the summer glove category, this glove got a revamp in 2021. It'll keep its best features, but will feature an updated design, which will include a brand-new ERGO PROTECH® one-piece shell. And it'll also be even more practical, with new features such as the Touch Screen<sup>36</sup> system so you can handle electronic devices with your gloves on. Its goat-leather topside, selected for suppleness and perforated for better ventilation, includes a 4-Way Spandex<sup>36</sup> comfort zone, for optimal riding pleasure. The wrist zone will come in Neoprene<sup>36</sup>, for excellent support that won't slow you down. The RS2's level of ventilation will be just as efficient as ever, and its "second-skin" comfort, perfect for everyday wear, are back for you to enjoy. Even more attractive, even better equipped. the new RS2 is already setting the new standard in its category.

- (Topside) Full-grain goat leather construction for suppleness, perforated for ventilation / 4-Way Spandex\*\*/ Neoprene\*\*
- (Palm) Synthetic leather with goat-leather reinforcement on the hypothenar
- ERCO PROTECH® one-piece metacarpophalangeal PVC protective shell underneath the leather
- 84. FIVE protective logos in TPR on the metacarpais
- #5. Mini-protective shells in soft TPR on the index and middle fingers
- Hypothenar protective shell (palm slider) in TPR

- Protective reinforcements in 3 mm foam underneath the leather on the ring and little fingers
- 88. Leather accordion comfort gussets on the thumbs
- 89. Fourchettes (finger contours) in stretch Nylon
- 18. Neoprene" wristband for enhanced comfort.
- TPR + velcro tab closure system and Lycra® gusset
- 12. Pull'N'Ride leather pull tab
- Touch Screen<sup>th</sup> system for handling electronic devices, on the index finger

### RS3 EVO

The multipurpose urban glove.

Totally redesigned in 2022 the RS3 EVO is meant to replace one of the most popular FIVE gloves, the RS3. Made for multipurpose urban use and designed for riders looking for a short, functional, comfortable, and affordable glove that offers a reasonable level of protection, the RS3 EVO is a basic you just can't live without, whether as your go-to glove or as a spare for a passenger. It features the very latest FIVE ERGO PROTECH® ergonomic protective shells for greater comfort and effectiveness, and its 4-Way Spandex\* topside construction gives it both excellent fit and major flexibility. Easy to slip on and take off, it's perfect for riders zipping all over town throughout the course of a day. It will be your faithful companion on your everyday urban rides at the controls of any type of machine. Could the RS3 EVO be setting the new standard in its category? All you have to do is try it, and you'll know it's true.

- 4-Way Spandex<sup>®</sup> construction (topside) for flexibility / Synthetic leather (palm) for durability
- One-piece FIVE ERGO PROTECH® TPR metacarpo-phalangeal protective shells under fabric
- 83. TPR hypothenar protective shell (palm slider)
- 84. One Way Stretch\* fourchettes for perfect fit.
- Neoprene<sup>™</sup> wristband for fit and comfort

- 30 mesh inserts over the wrist for better ventilation
- Textured 30 logos and TPR knuckle protective elements

# **GLOBE EVO**

The new-gen multipurpose urban glove.

The Globe Evo represents a significant evolution for the Globe, our style focused on meeting the essential needs of urban motorcycle and scooter riders looking for a super-affordable and practical glove. The Globe has been a top seller worldwide and has quickly become a must-have basic. The Globe Evo takes up the straightforward qualities of its predecessor, upgrading it with the latest generation of ERGO PROTECH® ergonomic protective shells and a new fit that makes it even more comfortable. It features just what you need to ride safely and comfortably in the city. With its updated construction and dynamic look, there's no doubt that the Globe Evo will set a new benchmark in the entry-level segment. It offers the Touch Screen® system on the index finger, so you can handle device screens, and its "no-leather" composition is sure to delight our vegan friends. The Globe Evo is THE ultimate affordable, versatile glove. Choose it as a main pair or an extra one for your passenger (it comes in both men's and women's versions).

# SPORTCITY EVO

The top leather city glove, now even better.

The SportCity, designated in its time as the "Top city glove" by influential Moto Magazine, was already one of our most successful styles. The SportCity Evo is even more elegant, protective, and enjoyable to wear every day. It stands out as the ideal short leather glove for riding on basic or classic motorcycles or scooters. Its exceptional fit makes it the perfect companion for when you're out on the town. Its clean, modern look, 100% full-grain perforated leather, and discreet FIVE embossed and flexible metal logo mean that it goes perfectly with any outfit, so harmoniously. It also represents a major leap forward in terms of protection, with the latest generation of ERGO PROTECH® protective shells concealed underneath the leather, for the topside shell, and a semi-soft, honeycombed "slider" on the palm, for unhindered grip on the handlebars. Its dual Touch Screen" system on the index finger and thumb allows you to use all the features of your GPS or smartphone without having to take off your glove, something super-practical in the urban jungle. The leather on the SportCity Evo, which is both tough and supple, ensures durability and comfort... Once it's subtly burnished and has taken on the contours of your hand, you simply won't want to take it off. Available in men's or women's versions.

- Perforated full-grain goat leather topside construction
- 02. Full-grain goat leather palm
- 63 ERGO PROTECH® metacarpal-knuckle protector concealed underneath the leather
- ERGO PROTECH® honeycombed semi-soft palm slider

### URBAN

The long urban glove.

A recent design from FIVE, made for urban use (as its name indicates), the Urban opts for a long, non-bulky cuff, offering its rider maximum protection and the option of wearing it over or under your jacket's sleeve. Compared to short gloves, the style of the Urban lends it a certain elegance that's clearly classic. You can feel safe, too, with its integrated one-piece PVC topside shell under the leather, and numerous protection elements. The perforated leather insets add visual appeal that's also practical, contributing to enhanced sweat evaporation. The accordion gusset on the wrist, coupled with a velcro adjustment tab, makes for easy on/off and perfect fit. And last, but not least, the Urban features the Touch Screen™ system that allows you to activate the touchscreen on a GPS or smartphone device. It's always practical not to have to take off your gloves to make a call or find your way in the urban jungle.

- Main construction in full-grain goatskin and perforated goatskin (topside and palm) for suppleness and ventilation
- Long cuff that includes protective foam on the forearm
- One-piece PVC metacarpal-phalangeal protection under leather (perforated for a great look)
- Foam protective cyshioning on the index, middle, ring, and little fingers.
- Comfort gussets for the index and middle fingers
- Lycra® between the fingers for suppleness and air circulation
- Synthetic leather palm reinforcement for grip
- 88. Synthetic leather reinforcement and TPR protective shell for the hypotheriar
- Simple closure featuring a synthetic leather and velcro tab
- Long leather cuff with integrated foam forearm protection and stretch accordion zone
- Touch Screen\* system (index finger) for handling device screens

BLACK #5-07/5-08/M-09/L-10 #L-11/29L-12/39L-13

### URBAN AIRFLOW

The long-cuff urban glove that keeps you cool.

- Wentilated 3D mesh fabric + perforated, supple goat leather main construction
- Long cuff including protective foam and stretch zone to protect the forearm

## X-RIDER WP

The short, weatherproof glove for globetrotters and sport riders.

Revamped in 2021, the last generation of X-Rider is proving even more versatile than its predecessor. Though it keeps gaining fans among globe trotters, who consider it the perfect glove to take them to the ends of the earth, the latest X-Rider will also be ideal for more sporty use (as demonstrated by the accordion tie between the ring and little fingers, a racing-glove detail), or even for urban riding, and it promises to excellently fulfill its role at the controls of a roadster. Weatherproof and breathable, with its new 5\_DRYTECH<sup>the</sup> membrane, technical, mid-length, so it's not too bulky, focused on a superb comfort / protection / durability ratio, the X-Rider commands respect. Tough, and characterized by its heat-molded cuff protection and its new visible metacarpal-phalangeal ERGO PROTECH® PVC carbon style shell, it retains an adventurous look. With its digital leather palm to maintain optimal grip, even in driving rain, the X-Rider is designed for those who ride everywhere, often, and in all kinds of weather.

- Combined full-grain cowhide construction for durability and goatskin for suppleness (topside) / Goatskin and digital leather for grip (palm)
- 82. 5\_DRYTECH\* breathable, weatherproof membrane
- 83. Bemberg<sup>w</sup> internal comfort lining
- 84. Forearm protection featuring a wide, semi-soft TPR shell
- 85. Visible one-piece ERGO PROTECH® PVC carbon look protective shell
- External knuckle protection with memory foam underneath the leather
- 87. TPR protective palm slider shell
- Closure system with leather + velcro tab and leather on/off pull tab
- Clear Vision Pad\* to wipe off helmet screen while riding
- Touch Screen<sup>to</sup> system for handling touchscreens without removing gloves

# STOCKHOLM GTX

Mid-length mid-season glove 100% weather-proof.

- Nylon windbreaker fabric (topside) / Full-grain goatskin (palm) construction
- Internal weatherproof GORE-TEX® membrane
- Bemberg\*\* internal comfort lining
- 84. Thinsulate® 150 g thermal insulation
- 85. PVC metacarpal-knuckle protective shells. underneath the nylon
- 86. TPR protective palm slider shell
- Full-grain goatskin palm reinforcement
- Cuff insulation with stretch ribbed fabric
- Closure system with a leather and velcro tab
- Touch Screen\* system (on index finger) for handling touchscreens without removing

# **URBAN** WP

The long urban glove that's... weatherproof.

A recent FIVE design made for urban use (as its name indicates), the Urban WP opts for a long, sleek cuff, to offer its rider maximum protection that can be worn either over or underneath your jacket's sleeve. Here we present its weatherproof version, featuring a 5\_DRYTECH\*\* membrane that allows you to use it when it rains. Compared to short gloves, the Urban WP's style confers a certain elegance and classic look. You'll also feel truly safe, due to its topside one-piece PVC shell underneath the leather, along with its many other protective elements. The accordion gusset on the wristband, coupled with a velcro adjustment tab, makes it easy to slip on and adjust to your hand. And finally, the Urban WP features the Touch Screen\*\* system, which allows you to activate your GPS or smartphone screens. It's so practical not to have to take off your glove to make a call or find your way through the urban jungle.

- Main structure in goat leather (topside and palm), for suppleness
- Long cuff that includes foam forearm protection
- 5\_DRYTECH\* weatherproof / breathable membrane
- One-piece PVC metacarpo-phalangeal protective shell underneath the leather
- Protective foam pads on the index, middle, ring fingers and thumb
- 86 Comfort gussets on the index and middle fingers
- Water-repellent Lycra® fourchettes, to combine flexibility with dryness
- Synthetic leather palm reinforcement for grip
- Synthetic leather reinforcement and TPR protective shell on the hypothenar
- Simple closure featuring a synthetic leather and velcro tab
- Touch Screen"system (on the index finger) for handling electronic devices.

# RSWP

The short, lightweight, weatherproof multi-purpose urban glove.

RS WP takes on the role in our Urban range of a short, weatherproof glove that's versatile and practical. Featuring metacarpal protective shells discreetly inserted underneath waterproof fabric, a shell on the palm, and, especially, a weatherproof membrane, it protects its rider just as much from risks in case of a fall as it does from bad weather. The advantage of a short, lightweight glove for urban use is clear: it easily and discreetly blends into your overall look and its reduced bulk makes it truly practical to carry around. It can therefore be your everyday partner, just in case the weather is unreliable, tucked into your bag or at the bottom of a top case.

- Weatherproof fabric construction (topside) for weather resistance / Synthetic leather (palm) for durability
- 82. HIPORA® weatherproof internal membrane
- 83 Bemberg\* internal comfort lining
- 84. Dne-piece TPR Soft metacarpal-phalangeal and phalangeal protective shells under fabric
- Hypothenar protective shell (palm slider) in TPR
- Perforated synthetic leather palm reinforcement for improved grip
- Neoprene<sup>®</sup> cuff for adjustability, comfort, and weather resistance
- Flap + veloro and synthetic leather pull-tab closure system
- 89. Touch Screen\* system (on index finger) for handling touchscreens without removing the glove

BLACK / FLUO YELLOW

### **MONTANA**

An authentic look for riding your Custom machine in cold weather.

Because, as a real Custom aficionado, you enjoy taking your machine for a ride when it's cold outside, as conditions allow, in other words, as soon as the sun comes out (which makes it a lot more enjoyable...), it's better to be ready with the right equipment.

FIVE has thought of everyone who wants to ride in comfort despite the cold, and in style, at the controls of a motorcycle full of personality, and we've been inspired by 1930s flight jackets, from a time when aviators needed to spend hours in a freezing cockpit, wearing warm, durable garments.

The Montana will delight you, first with its quality, and the suppleness and toughness of its full-grain cowhide leather, specially selected and coated for a truly authentic look that covers the back of the hand and the palm. But the most impressive thing here is the feeling of warmth and comfort when you wear it, thanks to its synthetic sheepskin lining around the wrist, and the polar-fleece internal lining throughout the hand, all the way down to the fingertips. There are two ways to wear the Montana: with the cuff rolled up or rolled down. The rolled-up position, which highlights the sheepskin-style lining, is secured with two snaps. And you simply need to fold the cuff down for it to cover or slip into your jacket, as you wish...or in case there's an unexpected rain shower. The Montana does

not feature a weatherproof membrane (this isn't its intended purpose), but the robust coated leather will, most often, suffice to protect you from a short, light rain shower, just as a real aviator jacket would. We've paid close attention to the bold vintage style of this piece, as you can see in the embossed pattern that adorns the large nubuck palm reinforcement, synonymous with durability and extra protection in case you make contact with the ground. And we haven't forgotten the back of the hand; the small gusset on the wrist, and the three impressive topstitches, accentuate its resolute character. In terms of safety, again, the wrist closure promises to hold the glove perfectly in place if you take a spill. Whether you feel like Charles Lindbergh during his first crossing over the Atlantic aboard his plane, the Spirit of St. Louis, or you're just a Custom fan who likes to cruise in the fresh air, there's no doubt that you'll appreciate the qualities of the Montana If Lindbergh were still flying today, he'd surely consider the Touch Screen\* system on the index finger and thumb, which is super-practical for handling a GPS indicator without taking off your gloves, an ingenious invention...

The Montana offers its rider a look that's both unique and authentic, along with cozy comfort, much appreciated when you're behind the wheel of a classic machine and it's cold (and dry) outside.

- Tough, coated cowhide leather construction (topside and palm)
- B2. Synthetic sheepikin lining and 5\_WARMTECH\* thermal insulation on the topside
- 83. Nubuck palm reinforcement
- 84. Adjustable cuff length with snaps
- 85. Embossed graphic ornament on the palm
- 86. Velcro wrist closure.
- Touch Screen\* system on the thumb and index finger
- 88. CE Level 1

### **CALIFORNIA**

For men of character.

This all-leather glove imposes its presence with its cross-stitched detail and quilted look that we usually find on the seats of the most beautiful custom machines. Its wide leather adjustment tab that closes on the top of the cuff breaks with tradition and reinforces the rather manily look of the California. The leather palm reinforcement that extends into an easy on/off pull tab demonstrates our desire to combine beauty with functionality. This is a strong glove, for strong men (with strong bikes).

#### TECHNICAL FEATURES

- Total full-grain goatskin construction for suppleness (palm and topside)
- Quilted and top-stitched leather metacarpal-knuckle protection
- Hypothenar muscle protection with full-grain cowhide reinforcement panel
- 84. Perforated goatskin palm reinforcement.
- 85. FIVE metal insignia

86. Closure system with leather + velcro tab and leather on/off pull tab

### ARIZONA

Vintage culture. reinforced protection.

The ARIZONA is a 100% full-grain leather glove with a distinct personality, beautifully combining quilted and perforated leathers, and allying design with protection. It features thick leather reinforcements over-stitched on the edge of the hand, which are not only decorative, but also aimed at protecting the rider's hand in the event of a fall. Closure via a leather tab with a press-stud embossed with FIVE. With its unique character, superb details, and quality materials, it is the very living essence of vintage culture.

- Total full-grain goatskin construction for suppleness (palm and topside), perforated for vertilation (topside)
- #2 Metacarpal-knuckle protection with memory foam concealed underneath the leather
- Hypothenar muscle protection with full-grain cowhide reinforcement panel
- 84. Perforated goatskin palm reinforcement
- 85. Leather accordion comfort gussets
   86. Closure system with leather tab
  - \* Press-stud and leather on/off pull tab

### TEXAS EVO

Bet on 5, again.

The Texas has always gotten people talking... Like a misunderstood star, it was adored by the public and the press, but "industry professionals" set it aside a bit too quickly because they didn't believe in it, contributing to its disappearance. Due to constant popular demand, we are now proud to announce the return of this style to the spotlight. And so, we present the Texas Evo, an evolved version that's affordable, sure to please just about everyone, and be just as alluring as it ever was. Though it may look like a "golfer", it's actually inspired by the golden age of motorsports, when a few Hollywood stars took part in competitive races behind the wheel (or handlebars) of racing machines. In 100% ultra-supple cowhide leather with external stitching, we choose it for its lightweight comfort, its 5 patch that reminds us of a numberplate, its vintage look, and its irresistible colors. Despite its vintage look, it manages to keep up with the times, to the point of featuring the Touch Screen\* system on the index finger AND thumb, so you can make optimal use of your smartphone's camera function. Nothing could be better for stylish, trend-conscious riders. So if you're ready to play, bet on number S. It's sure to come up a winner.

- Full-grain cowhide leather topside construction, including the top of the hand and the thumb in perforated leather
- 82. Full-grain cowhide leather palm
- External stitching on the fourchettes for greater comfort
- 04. Embroidered patch with the number 5
- 85. Velcro wrist closure
- Touch Screen\* system on the index finger and thumb
- 87. CE Levell

### **OKLAHOMA**

The universal custom glove.

The current "Custom craze" is being fed by several different styles (the Café Racer, Bobber, Vintage, and Neo-Retro trends, among others), which end up blending to create something truly interesting. And so, we wanted to offer a glove that everyone would like, whatever your favorite influence(s) may be. It's up to you to write your own Oklahoma story...Café-racer fans who ride bikes inspired by '70s competitive motorcycles will appreciate the touch of racing-glove-style: external stitching, a protective flap over the adjustment tab, protective cushioning over the knuckles. Those who favor Custom vintage machines, like a Harley with a rusty tank plate, are sure to like the large, visible topstitching around the piped edges of its short cuff, or its internal lining adorned with rather inspired custom graphics. For those Neo-Retro lovers who are used to combining modern comforts with all the charm of times past, they will undoubtedly notice the smooth, luxurious look of the cowhide, paired with the rough texture of nubuck, giving the Oklahoma its classic appeal. This glove stands at the crossroads of different trends, and, if there's one aspect that everyone can agree on, it's the level of protection it offers. So...is the Oklahoma authentic, protective, and truly universal? Definitely!

- Full-grain cowhide construction (palm and topside), for durability
- 82. Nobuck palm reinforcement
- Dne-piece PVC metacarpophalangeal protective shell underneath the nubuck
- 84. External stitching on the fingers, for optimal fit
- Protective foam knuckle reinforcements concealed underneath the leather
- 86. Comfort gussets on the wrist band
- 87. FIVE Custom logo embassed on the leather
- Internal cuff lining enhanced with custom graphics
- Becorative top-stitching around the piped cuff edges
- Leather and velcro closure system and adjustment tab underneath a protective flap
- "Feel your ride" inscription concealed underneath the protective flap
- Touch Screen<sup>th</sup> system on the index finger, for handling electronic devices

### KANSAS

Our most protective custom glove.

The Kansas stands out as our most protective custom glove. Featuring a one-piece metacarpal protective shell inserted underneath the leather, and several reinforcements on exposed zones, it offers extra comfort and exceptional adjustability and touch sensitivity on the controls, due to, among other elements, its outer stitching. Its countless details, comfort gussets and top-stitching, double closure with a zipper and leather and velcro flap, or its incredible level of finishing, make it a piece that leather lovers who want to look good will appreciate, without neglecting their safety. The Kansas marvellously combines classic style with a modern touch, since its index finger hosts the Touch Screen\* system that allows you to handle touchscreens without removing your glove.

- Total full-grain goatskin construction for suppleness (palm and topside), perforated for ventilation (topside)
- Dne-piece PVC metacarpal-knuckle protective shell underneath the leather
- 83. Outer stitching on the fingers for optimal fit.
- 84. Closure and adjustment system with zipper
   + veloro tab and on/off pull tab
- Leather accordion comfort panels on fingers and thumb
- 86. Accordion leather + Elastic cuff for greater comfort
- Hypothenar muscle protection with full-grain cowhide reinforcement panel and memory foam featuring embossed logo
- 88. Touch Screen" system on index finger for handling touchscreens.

### **MUSTANG EVO**

The evolution of a bestseller.

The Mustang used to represent the "little Custom leather glove that everyone likes", with its minimalist aesthetic, ultra-compact size, and delicate comfort. Allow us to introduce the Mustang Evo, an optimized and updated version of this iconic style. We've totally redesigned it, using our new, exclusive palm-to-thumb construction, for a fit that's even more precise and comfortable. It's made in 100% full-grain goat leather, renowned for its suppleness and perforated for better airflow and sweat evaporation. The Mustang Evo has opted for a subtle look, with its protective shell hidden underneath the leather and its large insert adorned with a FIVE Custom logo embossed on the palm. Its closure system is now placed on the inside of the wrist, which makes for easier handling with a more intuitive feel and a tab that's less likely to open unexpectedly. Safety has been reinforced by subtly lengthening the glove for better wrist coverage, without changing the "ultra-short" character that made the Mustang so successful. It's been a logical, practical evolution, with the addition of the Touch Screen™ system that allows you to handle device touch screens without taking off your gloves. The Mustang Evo is sure to go perfectly with any Custom or neo-retro machine or even with more conventional motorcycles, since it's so alluring, with its universal, timeless style. Available in Men's or Women's versions.

- Perforated goat leather topside construction
- 82. Supple full-grain goat leather palm
- TPR metacarpal-knuckle protective shell underneath the leather
- 84. Leather palm reinforcement
- 85 Embossed FIVE Custom logo
- 86. Touch Screen" system on the index finger
- New Velcro closure positioning underneath the wrist

### **COLORADO**

When it comes to all things Custom, we often only remember the essentials, the basics of motorcycling: a chassis, an engine, the controls, and two wheels are all we need to be happy. The same thing applies to the Colorado. In other words, when less truly becomes more... Less panels, less stitching, less protective elements, for greater comfort and control sensitivity. Inspired by a minimalistic approach that's straight out of Japan, the Colorado reminds us of the automotive gloves of the 1960s. The suppleness of full-grain leather invites you to ride your bike subtly and skilfully. Its second-skin smoothness, enhanced by its distinctive construction (with middle and ring fingers separate from the rest of the structure, and one long outer seam around the fingers), will make you feel like you're wearing nothing at all. But the sturdiness of the cowhide will save your hands if you happen to take a spill. Its adjustment tab adorned with a metallic grommet positioned over the wristband adds to the comfort and sleek look of the Colorado. This is a glove you'll choose more for its feeling of freedom than for the protection it provides, there no doubt about it.

- Full-grain cowhide construction (topside and palm), for durability
- Quilted foam hypotheriar reinforcement underneath the leather on the palm side
- 83. Distinctive construction, with the middle and ring fingers separate from the rest.
- 84. One long outer seam on the fingers and thumb, for optimal fit.
- 85. Multiple leather perforations on the top of the fingers, for style and ventilation
- Metallic grommet and FIVE Custom embroidered label
- Comfort gussets on the inside of the wrist.
- Topside closure and adjustment system, featuring a leather and velcro tab

### *10WA 66*

The quintessential custom glove.

The IOWA 66 is designed to reflect the very essence of a custom-vintage glove. Fans of custom style sometimes convert work gloves for riding use, but the problem is that they don't fulfil any of the essential characteristics needed when driving a motorcycle, either in terms of comfort or safety. FIVE now offers a style inspired by these gloves that are highly popular with custom addicts yet featuring specs that are unique to steering a two-wheeled vehicle. And this makes all the difference. Crafted in particularly durable full-grain cowhide that offers a suppleness that's rare for this type of glove, the IOWA 66 stands out from the pack with its extreme comfort and a fit that's head-and-shoulders above the rest, notably due to its thumb construction inherited from our experience in racing. Beneath its seemingly minimalist appearance, it features all the best that FIVE has to offer in terms of quality fit and control sensitivity, as well as the attention to detail typical of our designs. Everything has been envisioned for this apparently minimal glove to offer you maximum enjoyment (and authenticity) when you're at the controls.

- 81. Full-grain cowhide construction (topside and palm) for durability. while offering major suppleness
- Intentional patinated effect
- External stricking on the fingers 03. for enhanced comfort.
- 3 top-stitches on the metacarpals
- 85. Engraved FIVE Gloves Custom logo
- 86. Thumb construction that avoids wrinkling on the palm
- 87. Leather and velcro tab closure

## KANSAS WP

The Custom glove that's ultra-protective... even from the rain.

Because you may want to ride in Vintage or Neo-Retro style even when the weather's bad, FIVE now offers a weatherproof mid-season version of its top-selling Custom style. Based on our most protective Custom glove, the Kansas WP echoes all the characteristics of the Kansas, with the addition of a weatherproof, breathable 5\_DRYTECH<sup>™</sup> internal membrane to keep your hands dry when it rains. Featuring a one-piece metacarpal protective shell inserted underneath the leather, and numerous reinforcements at exposed points, the Kansas WP offers extreme protection. It also offers an optimal level of comfort, fit, and control sensitivity for a weatherproof glove, due to, among other factors, its external stitching. It marvelously combines a classic spirit with modern details, since its index finger hosts the Touch Screen<sup>™</sup> system that lets you handle device screens without taking your glove off. The look and the weatherproof nature of the Kansas WP are sure to delight fans of bold machines, who never say no to a ride, even when the weather looks unpredictable.

- 100% full-grain goat-leather construction, for suppleness (topside and palm)
- One-piece PVC metacarpophalangeal protective shell underneath the leather
- External stitching on the fingers, for optimal fit
- 84. 5\_DRYTECH\* weatherproof breathable membrane
- 85. Internal comfort lining
- 86. Dissure and adjustment system featuring a zipper + veicro flap and on/off pull-tab
- 87 Leather accordion comfort gussets on the fingers and thumb
- 88 Leather accordion + elastic wristband, for added comfort
- Hypothenar protection from a fullgrain goat-leather and memory-foam reinforcement panel that includes an embossed logo
- Touch Screen<sup>th</sup> system on the index fingers, for handling electronic devices

### TFX1 GTX

#### The ultimate Trail Adventure glove!

The TFX1 has all you need in terms of protective elements, without hindering your movements when you ride, including a large SuperFabric® insert inside the palm, all the way through to the outer fingers, to protect you if you take a spill, without interfering with proper grip, or its new ERGO PROTECH® shell in semi-soft TPR. Its dual-fastening system with a V-shaped band and velcro allows for ultra-precise adjustment over or underneath the sleeve of your jacket. Featuring Clear Vision Pad™ visor-cleaning and Touch Screen™ systems, the TFX1 always keeps you in control of your navigational devices. Its technical qualities and cutting-edge design are sure to satisfy those who can't imagine heading off on a long road trip without the right equipment... and who want nothing less than the very best!

- Topside: Water-repellent stretch and RipStop<sup>™</sup> fabric construction for weatherproofing and comfort.
- 92. Palm: full-grain goat leather for suppleness, and digitalized leather reinforcement at contact points for optimal grip in wet weather, and wide SuperFabric® protective reinforcement that covers the thenar eminence and the hypothenar
- GORE-TEX® Grip<sup>™</sup> breathable, weatherproof membrane molded to the lining on the palm side
- 84. ERGO PROTECH® one-piece metacarpophalangeal protective shell in soft TPR. Memory-foam and TPR reinforcement on the back of the hand
- 85. Phalangeal protective elements in soft TPR on the index and middle fingers
- Forearm protection with a thick semi-soft TPR 3D shell
- Wide SuperFabric® reinforcement on the little and ring fingers
- Anti-twist accordion strap between the little and ring fingers so your fingers don't get pulled apart if you fall (a FIVE innovation)

- Comfort gusset on the index and middlefinger joints
- Outside seaming on the fingers
  - Memory-foam reinforcements on the thumb and palm
- 12. Silicone print on the palm for improved grip
- Inner lining featuring "map"-style silkscreened design
- Stretch V-shape and velcro dualconstruction closure system with gripper tab, one on the wrist and the other on the sleeve, for perfect fit
- Pull N Ride tab for easy on/off
- 30 reflective patches
- Clear Vision Pad<sup>™</sup> visor-cleaning system on the left-hand side
- 18 Touch Screen\* system (index finger and thumb) for handling electronic devices

### TFX2WP

For farsighted adventurers.

The TFX2 is made for adventurers who leave nothing to chance. And, in particular, for those who demand a protective and comfortable glove that allows them to ride worry-free on any type of road, or face anything that Mother Nature can throw at them. Because when you set off for adventure, you may set off under bright sunshine, and finish the day in the driving rain. With its water-repellent, laminated fabric construction and its S\_DRYTECH\*\* weatherproof/breathable membrane, it offers unparalleled dryness, while allowing for a healthy evaporation of perspiration, which often happens when you ride hard on unpaved tracks. The TFX2 offers many details that are essential for long rides, like the Clear Vision Pad™visor-cleaning system, or the Touch Screen™ electronic device-handling system, which allows you to find your way easily using your GPS or smartphone, without taking your glove off. And we haven't skimped on protection here, either, with its PVC shell and numerous reinforcements, on the topside, and its wide Kevlar® panel on the palm side, covering from the base of the hand all the way up to the hypothenar, under which three foam elements are inserted, for comfort. The palm also features a Digital PU reinforcement for impeccable handlebar grip when it rains. Comfortable, lightweight, and tough, both on falls and on rainstorms, the TFX2 will be there, ready to take on any adventure.

- Stretch, water-repellent fabric construction (topside), for dryness and comfort / Full-grain goat leather (palm), for suppleness
- III 5\_DRYTEO+\*\* weatherproof breathable membrane
- One-piece PVE metacarpo-phalangeal protective shell underneath the fabric / Window-panel construction
- 84. Soft TPR index and middle-finger knuckle protection
- Index and middle-finger comfort gussets, with reflective inserts.
- Protective foam reinforcement, on all knuckles.
- 07. Forearm protection from a cuff with integrated memory foam.

- Wide Keylar® reinforcement, from the base of the hand, all the way up to the hypothenar
- Bigital PU palm reinforcement, for better grip on the handlebars
- Dual closure system (wristband and cuff) using an elastic strap and velcro
- Adjustment tab concealed underneath a Kevlar® panel
- 12. Retro-reflective fabric on the wristband
- Lycra®-style fourchettes (between the fingers)
- 14. Clear Vision Pad\* visor-cleaning system on the left-hand side
- Touch Screen\* system (on the index finger) for handling electronic devices

BLACK / GREY

## TFX3

The short glove for long tracks, either paved or graveled.

Another asset in our Trail Adventure range, the TFX3 is a small, lightweight, short glove that won't weigh you down, perfect for taking on all types of road trips or rides when the weather's fine. Protective and comfortable, it boldly shows off its adventurous spirit with its elegant look and meticulously designed technical specs. The Clear Vision Pad\* and Touch Screen\* systems for navigating comfort, Digital PU insets on the palm and the thumb for grip, a wide 2-Way Spandex\* strip on the topside for flexibility, ERGO PROTECH® TPR shells and Kevlar® reinforcement for protection, and a goatskin palm for suppleness... the TFX3 has everything to make it your perfect companion. And because you can never be completely sure there won't be some scattered showers, especially in the summer, it even features, on its topside, coated, water-repellent stretch fabric that makes the drops slide right off. And we haven't even mentioned its weatherproof qualities, almost like it had a membrane; we could call it water-resistant, enough to protect you from unexpected light rain. The TFX3: all the advantages of a short, lightweight glove to venture out on the track in summertime, whether you hit the road or ride on gravel.

- Water-repellent stretch fabric (upper) construction / Full-grain goatskin (palm) for suppleness
- Dual soft-TPR ERGO PROTECH® metacarpophalangeal protective shell.
- 83. 2-Way Spandex\*\* panel for flexibility
- 84. Ring and pinky finger knuckle protection in Soft TPR
- Foam protective reinforcements on all knuckles on the outer fingers
- Kevlar® reinforcements on the hypothenar muscle
- BP Digital PU reinforcement for enhanced grip on the handlebars
- 88 Quick-close Velcro tab system

- 89. Reflective fabric on the wrists
- Lycra®-style fourchettes (between the fingers)
- Clear Vision Pad\* screen-cleaning system on the left hand
- Touch Screen\* system (index finger) for using touchscreen devices

## **TFX3 AIRFLOW**

For a breath of fresh air.

A ventilated version of the TFX3, the TFX3 Airflow qualifies as a small, short, lightweight, and thus, non-bulky glove that's perfect for all types of road trips or treks in dry, warm weather. It naturally echoes the characteristics of the TFX3, though with materials designed to optimize airflow. Both protective and comfortable, it also offers an adventurous look. With its Touch Screen\* system for navigational comfort, a Digital PU panel on the palm and thumb for better grip, a wide 30 Mesh band on its topside for ventilation, ventilated ERGO PROTECH® TPR shells and Kevlar® reinforcements for protection, and a palm in goat leather for suppleness, perforated for airflow, the TFX3 Airflow has everything to make it your perfect travel companion, whenever the mood strikes to... get some fresh air.

- Mixed fabric and honeycombed 3D Mesh construction (topside), for ventilation and comfort / Full-grain goat leather (palm) for suppleness, perforated for airflow
- 82. Dual ventilated FIVE AirGD PROTECHOB soft-TPR metacarpo-phalangeal protective shells.
- Ring and pinky finger knuckle protection in Soft TPR
- 84. Foam protective reinforcements on all knuckles on the outer fingers
- 85. Kevlar® reinforcements on the hypothenar muscle
- 86. Digital PU reinforcement for enhanced grip on the handlebars.
- 87. Quick-close Velcro tab system
- 88. Reflective fabric on the wrists
- 89. Airmesh fourthettes (between the fingers)
- Touch Screen\* system (index finger) for using touchscreen devices

## TFX4

#### For new adventurers.

The TFX4 represents the entry-level style in the FiVE Trail-Adventure range. In every sense of the world Accessible, because it's inexpensive, easy to wear, and because it meets all your basic needs for paved or dirt-road use. Lightweight, comfortable, and sleek, it is nevertheless quite protective, with its dual ERGO PROTECH® soft shell and wide Kevlar® panel covering nearly half of the palm, made of synthetic leather. Indeed, the TFX4 features no elements of animal origin, to the delight of vegan adventurers. A silicone print on the index and middle fingers improves your grip on the controls in wet conditions. The use of water-repellent fabric on the zone around the protective shells allows the water to slide over this area, in case you get splashed when you cross a river or get peppered by unexpected light rainfall. The TFX4 is, admittedly, not weatherproof, but this makes it even more versatile. This is a glove you'll reach for when you want to travel light, yet it has so many possible uses. From a ride on a sun-drenched road, to a jaunt on a gravel run in much less predictable circumstances, the TFX4 is always ready to head off for adventure.

- Mixed stretch, water-repellent fabric and 4-way Spandex<sup>™</sup> construction (topside)
- 82. Synthetic leather palm
- Bual soft-TPR ERGO PROTECH® metacarpophalangeal protective shell
- 84. Wide Kevtar® reinforcement, from the base of the hand all the way up to the hypothenar
- 85. velcro closure tab and base of the thumb in Airprene® fabric, offering both support and ventilation
- 86. Lycra/B-style fourchettes (between the fingers)

- Touch Screen\* system (on the index finger) for handling electronic device screens
- Anti-slip silicone print on the index and middle fingers, for better grip on the controls
- Deflector flap in retro-reflective fabric on the top of the hand
- Heat-welded FIVE sonic logos that act as protective elements

## WFX PRIME GTX

The new-generation winter glove.

With the WFX Prime, FIVE offers real innovation, introducing its first heat-sealed, seamless glove, for total weatherproofing. The construction of this premium winter glove has a truly modern feel.

Our use of cutting-edge materials, such as Soft-Shell construction, a CORE-TEX® Grip™ membrane, and Primaloft® Gold ultra-high-performance, water-repellent thermal insulation has made for a weatherproof, warm winter glove that's light on bulk. It also offers unparalleled control sensitivity for a winter glove, with any bulk contained around the hand area, and exceptional dynamic and thermal qualities so you can fearlessly face the storms and the cold. Because in winter, it's easy to take a spill when the temperatures drop, the WFX Prime features top-of-the-line protective elements, such as the new ERGO PROTECH® one-piece shell or the large panel in SuperFabric®, a heavy-duty fabric that contains Epoxy resin microbeads covering most of the palm zone, all the way up to the outer fingers. These elements protect you without slowing you down, since it's crucial to have total freedom of movement in the fingers and stay alert at the controls when you ride in wintertime conditions. And so, with all this mind, we proudly present the WFX Prime: all the advantages of a lightweight, supple glove, with total warmth as a bonus.

- Topside: construction in Soft Shell fabric
- Palm: full-grain goat leather for suppleness, with a digitalized rubber reinforcement at the contact point. for optimal grip in wet weather. and a wide SuperFabric® protective reinforcement covering the thenar eminence and hypothenar, lined in memory foam
- 83. GORE-TEX® Grip\* breathable, weatherproof membrane that molds to the shape of the palm lining
- 84. Primaloft® Gold 200g water-repellent thermal topside insulation (equivalent to double its weight at our competitors) and Primaloft® Grip Control 60g on the palm side
- 85. Seamless heat-sealed construction for optimal weatherproofing
- 86. ERGD PROTECH® one-piece metacarpophalangeal protective shell in heat-sealed soft PVC inserted underneath the Soft-Shell fabric
- 87. Over Size Cuff System: adjustable cuff system. This allows you to adjust the cuff around your jacket's sleeve and includes a weatherproof YKK zipper

- 88. Dual cuff and wrist closure system, with a large digital rubber and velcro tab. Wrist-fastening strap with gripper tab in TPR, secured underneath a leather flab
- Reflective logo embelishments and textured inserts
- Memory-foam and TPR reinforcement on the thumb, ring, and little fingers
- Comfort gusset at the joints and on the wrist
- 12 Bemberg<sup>re</sup> internal comfort lining for more softness
- 13 Weatherproof, anti-drip cuff lining Clear Vision Pad\* visor-cleaning system
- 14 on the left-hand side
- Touch Screen's system (index finger) for handling electronic devices

## WFX CITY GTX

Length to chose... comfort in both.

You can choose between a long and a short version. The WFX City is the perfect glove to face the winter with elegance, both in the city or the suburbs, and handle middle-distance road trips with total peace of mind. Its Stretch Cordura® topside construction acts as a windbreaker, and is also flexible enough to offer maximum comfort. Its leather palm and shells concealed underneath the fabric offer perfect protection. Thermal insulation and weatherproofing are ensured by, respectively, a Thinsulate\* 200g lining and a breathable GORE-TEX® membrane.

- Weatherproof, windproof Stretch Cordura® construction (topside) / Full-grain goatskin for suppleness (palm)
- 82. Weatherproof internal CORE-TEX® membrane
- 83. Bemberg\* internal comfort lining
- 84. Thinsulate\* 200g thermal insulation
- 85 PVC metacarpal-knuckle and knuckle protective shells underneath the fabric
- 86. TPR protective palm slider shell
- 87. Perforated goatskin palm reinforcement
- Dual closure system with leather \* velcro tab and weatherproof zipper (long)
- Closure system with wide Neoprene<sup>34</sup> and velcro strip (short)

## WFXSKIN EVOGTX

The new all-leather urban & touring GORE-TEX® winter glove.

The WFX Skin Evo GTX represents an alluring evolution of the WFX Skin GTX, our bestselling urban/suburban winter glove. Though its predecessor was essentially designed for city riders, the WFX Skin Evo GTX wants to be more versatile. It widens the riding spectrum and will also delight Touring fans looking to have an understated, comfortable, and elegant leather glove to face the winter. Made mostly of fullgrain Napa goat leather, renowned for its extreme suppleness, with the addition of a few stretchy Softshell fabric inserts for ease of movement and comfort, it aims to be protective, in every sense of the word, in the city or on the road. Its GORE-TEX® weatherproof, breathable membrane and PrimaLoft® Gold water-repellent thermal insulation offer the best possible guarantee that you'll stay dry and warm in bad weather; this is why we've opted to use these premium elements on the WFX Skin Evo GTX. And to stop any raindrops from getting inside your sleeve, the cuff is now covered with Taslan" water-repellent fabric, for truly optimized weatherproofing. In terms of safety, the WFX Skin Evo GTX has

naturally adopted the latest generation of FIVE ERGO PROTECH® ergonomic protective shells, including a semi-soft, honeycombed shell on the palm, to protect you in case you take a spill. The topside shell is simply concealed underneath the leather, for a more subtle look. The dual-closure system also promises perfect fit and support. We've obviously also offered you the ability to handle your touchscreen devices and wipe off your visor while you ride with the WFX Skin Evo GTX, which features the Touch Screen™ and Clear Vision Pad™ systems. Discretion and protection (against the cold, rain, and any falls) are the key concepts that we had in mind when we developed the WFX Skin Evo GTX.

As you can see, here, we're in the presence of a refined and comfortable glove that will take you elegantly and effectively from the city during the week to the road on the weekends, all winter long. Available in men's or women's versions.

- 81. Napa goat leather + softshell topside construction
- 82. Full-grain goat leather palm 83. CORE-TEX® weatherproof / breathable membrane
- PrimaLoft® Gold 200g thermal insulation on the topside
- PrimaLoft® Grip Control 60g thermal insulation on the palm
- 86. ERGO PROTECH® metacarpal-knuckle protector
- 82. ERGO PROTECH® honeycomb palm slider
- **Dual Closure System**
- 89.
- Clear Vision Pad® on the left hand. Touch Screen® system on the index finger and thumb
- 11 CE KPI

## WFX1 EVO WP

The winning combination of leather and fabric to face the rigors of winter.

Usefully combining the benefits of leather with the technical advantages offered by some synthetic materials was our goal in designing the WFXT EVO WP, a modern, warm, comfortable, protective, and supple glove to face the harshness of winter. Its entire palm is made from goat leather, renowned for its extreme suppleness. The same goes for most of its topside construction, to which we've added water-repellent, stretch technical fabrics. The main asset of this WFX1 EVO WP is clearly its Primaloft® thermal insulation, a sort of water-resistant, synthetic down fill that captures the natural heat of your hands to create a thermal barrier against outside temperatures. The 5\_DRYTECH" membrane ensures the breathability and weatherproofing you need when it's raining it's glued to the palm, ensuring that it stays put and offering better grip on the handlebars. An internal lining on the top of the hand in synthetic fur adds a feeling of soft comfort that's comforting when the cold gets

to you. Protection is provided by a onepiece ERGO PROTECH® shell concealed under the fabric on the metacarpals, and by the very latest in soft palm shells, along with reinforcements on the outer fingers. Comfort gussets around the wrist contribute to perfect freedom of movement. Particular attention has been paid to the cuff and the closure system. The Over Size Cuff System allows you to adjust the length of the cuff using a weatherproof zipper, so you can more easily wear it over your jacket's sleeve. A two-point adjustment-strap anchor ensures perfect wrist hold. The WFX1 EVO WP features elements that make your everyday ride more enjoyable, such as the Touch Screen™ system for handling device screens, or the Clear Vision Pad™ on the left hand, which allows you to wipe off your helmet visor while you ride. WFX1 EVO WP: the glove designed for long rides in the rain or cold, while your hands stay warm and dry.

- Mixed goat leather and fabric construction (topside) / Goat leather (palm)
- 82. Weatherproof and breathable 5\_DRYTECH\* internal membrane
- Primaloft® Silver 200g (topside) and Primaloft® Grip Control 60g (palm) thermal insulation
- 84. ERGD PROTECH® PVC metacarpophalangeal protective shell under nylon
- ERGO PROTECH® soft TPR hypothenar protective shell (palm slider)
- Palm reinforcement in embossed synthetic leather for optimal grip on the controls

- 87. Nylon accordion comfort gussets
- 0.0. Textured, reflective 3D logos
- Dual closure system with a concealed velcro adjustment tab under leather, and a cuff adjustment strip
- Touch Screen" system for handling touchscreen devices
- Clear Vision Pad" system (left hand) to wipe off your helmet visor while you ride

## WFX2 EVO WP

Updated, but still affordable.

What makes the WFX2 EVO WP stand apart is the real "state of the art" quality and enjoyment its construction offers. Though designed for wintertime urban and suburban use, it may very well take you much further, with features inspired by high-end road gloves.

- Nylon construction (topside) / Synthetic leather with goat leather reinforcement (palm)
- 82. Weatherproof and breathable 5\_DRYTECH\* internal membrane
- 83. Primaloft® Silver 200g (topside) and Primaloft® Crip Control 60g (palm) thermal insulation
- 84. ERGO PROTECH® PVC metacarpophalangeal protective shell under nylon
- TPR protective hypothenar shell (palm slider)
- 86. Palm reinforcement in embossed synthetic leather for optimal grip on the controls.

- Nylon accordion comfort gussets
- 88 Reflective logos
- Bual closure system with a concealed velcro adjustment tab under leather, and a cuff adjustment strip
- Touch Screen\* system for handling touchscreen devices
- Clear Vision Pad" system (left hand) to wipe off your helmet visor while you ride

## WFX3 EVO WP

Greater comfort and warmth for winter.

The new WFX3 Evo WP is made for those who want to ride with peace of mind all winter long, in the city or on medium-distance journeys, with a warm, effective glove at an affordable price. Combining water-resistant Softshell-fabric topside construction with a palm in Amara synthetic leather, and featuring genuine leather reinforcements for enhanced protection and durability, this glove uses our signature solutions for weatherproofing and thermal insulation. These include a 5\_DRYTECH\*\* waterproof, breathable membrane and 5\_WARMTECH\* integrated thermal insulation (200g on the topside / 60g on the palm), developed specifically for motorcycle riding by our R&D department, ensuring your protection against the rain and cold. One of the characteristics of the 5\_DRY-TECH™ membrane is that it's perfectly bonded with the palm, for optimal grip on the handlebars and impeccable fit. In terms of safety, the WFX3 Evo WP offers the latest

generation of ERGO PROTECH® ergonomic protective shells developed by FIVE, along with reflective elements that are so useful in winter, when the days are shorter, to help you stay visible to others on the road. Its dual-closure system also provides an additional guarantee of safety. In terms of practicality, the Touch Screen™ system on the index finger allows you to handle your GPS or smartphone touchscreens without taking your gloves off.

With its updated aesthetic, total comfort, and optimized features, the WFX3 Evo WP offers an even more alluring package than its predecessor and positions itself as the obvious choice for anyone who wants a winter glove that provides excellent value and performance for the money.

- 81. Softshell topside construction
- 82. Amara synthetic leatherpalm with genuine leather reinforcements
- 5\_DRYTECH\* weatherproof, breathable membrane
- 84. 5\_WARMTECH\* 200g thermal insulation on the topside
- 5\_WARMTECH\*\* 60g thermal insulation on the palm
- B6. Dual closure system (Wrist & Cuff)
- ERGO PROTECH® metacarpal-knuckle protector
- 88 ERGO PROTECH® palm slider
- 89. Touch Screen® system on the index finger
  - 8. Reflective print
- 11 CE KP1

## WFX FROST WP

The short winter glove to take on long winters.

Because you might want to ride in the cold without getting weighed down by a long glove, we present FROST, a short glove designed to take on the coldest of winters. It combines a topside in weatherproof stretch fabric with a full-grain goatskin palm. Non-bulky, but warm: the thermal insulation is covered by a 180g Thinsulate\*\* internal lining and ribbed cuffs. Comfort lining in synthetic fur, on the top of the hand, makes FROST soft and cozy. Its weather-resistance comes from a HIPORA® membrane. In terms of protection, a one-piece PU shell is discreetly concealed underneath the outside surface, on the metacarpals. The palm features a TPR shell and synthetic leather reinforcement, as well as a non-slip reinforcement in large-mesh synthetic leather at the contact point with the handlebars. Add in a Touch Screen™ system on the index finger so you can handle your touchscreens without removing your gloves, reflective elements placed on the back of the hand, an ultra-practical pull-tab, and you get a simple, discreet winter glove full of features that will slide beautifully under your favourite jacket, coat, or down jacket.

- Weatherproof stretch fabric construction (topside) for weather-resistance and comfort / Full-grain goatskin (palm) for suppleness
- HtPORA® weatherproof membrane
- Bemberg<sup>th</sup> internal comfort lining
- Thinsulate\* 180g thermal insulation 84
- PU one-piece metacarpal-phalangeal protective shell underneath fabric
- Hypothenar protective shell (palm slider) in TPR
- Non-slip large-mesh synthetic leather palm reinforcement
- 88 Ribbed sleeve
- Reflective print for night-time visibility
- Quick on/off system with ribbed fabric 10 and synthetic leather tab
- 11. Touch Screen\* system (on index finger) for handling touchscreens

### **WARMITECHI**

The WFX4 WP is our new entry-level offering and seeks to make the key features that make winter gloves effective in the city or on short rides, affordable and accessible to all (men, women, and children)... with quality fit as a bonus (the famous FIVE fit)! It features 170g 5\_WARMTECH\*\* thermal insulation on the topside of the hand, which is lined with insulating foam on the palm side, to effectively protect your hand from the cold. And since it's better to be prepared for humidity or rain, which are more common in winter, the WFX4 WP also has a waterproof, breathable 5\_DRYTECH\* membrane, developed specifically by our R&D department for motorcycle use, which is also partially bonded to the palm for optimal grip on the handlebars and perfect fit. Its "no-leather" construction (topside construction in water-repellent Softshell fabric and the palm in Amara synthetic fiber) makes it a 100% vegan product, which should delight anyone who cares about animal welfare. Like its more advanced siblings, the WFX4 WP offers the latest-generation ERGO PROTECH® ergonomic shells, developed by FIVE, ensuring excellent protection without hindering your movements. Ultra-practical, the Touch Screen™ system on the index finger allows you to use your GPS or smartphone touchscreen without taking your gloves off. As a main pair for budget-conscious riders, or an extra pair to keep in your top case, the WFX4 WP is an interesting and affordable base product to help you keep riding your motorcycle or scooter in the winter. There's no doubt. about it: it's the one to take out as soon as temperatures start to drop.

- B1 Softshell topside construction
- Amara synthetic leather palm
- 5\_DRYTECH\* weatherproof, breathable
- 84. 5\_WARMTECH\*\* 170g thermal insulation on the topside
- 85. Insulating foam on the palm
- 26 ERGO PROTECHIO metacarpal-knuckle protector
- 82 ERCO PROTECH® palm slider
- 88 Velcra-wrist clasure
- 89 Touch Screen's system on the index finger
- 10. Vegan-Friendly
- CE KPT

#### FIVE HEATING TECHNOLOGY: Thank you, Electricity!

In theory, a heated glove is a winter glove with an added electrical resistor circuit powered by individual batteries, placed within the gloves or directly connected to the motorcycle\*.

Its purpose is to produce artificial heat that repels the cold riders eventually feel when at the controls of a motorcycle in winter. But the inclusion of these electrical circuits requires a specific design and a certain level of expertise.

Our HG technology includes 1.3 mm-thick resistors (in other words, electrical wires), strategically placed on the back of the hand and the fingers, all the way down to their very tip, and on the inside of the last phalange. This type of construction offers uniform heat right where the cold is most acute, without compromising on palm sensitivity. Indeed, we haven't placed electrical resistors on the inside of the palm so we don't hinder your grip on the controls, but we have inserted a thin layer of thermal insulation. The heated handlebars grips of some motorcycles, which heat the inside of the palm, offer a good addition to heated gloves, which warm up the zones that are most exposed to the cold: the back of the hand and the fingertips. But there's a major difference between the temperature sent through the resistors and what the rider will feel when they're on the move. The latter depends on external factors such as riding speed, the outside temperature, the wind, the length of the ride, the period

of exposure to the cold, each individual's temperature sensitivity, etc. Each rider will thus adapt the level of heat as desired, depending on these different parameters. Our system offers 3 levels of heat: Eco, Regular, and Boost. Each of these sends 45°C, 50°C, or 60°C heat through the circuit, to keep hands at a comfortable temperature. The goal isn't to feel too much heat, but simply to make sure that your hands don't get too cold during your ride. In Eco mode, battery life can last up to 6 hours. In Boost mode, which consumes more energy, power will last for around 2 hours. Battery life will vary depending on various parameters (the actual battery charge level, the temperature, the level of humidity, etc.).

Our new HG technology now features a second cable within the battery pocket for connecting the gloves to an AC electrical charger or our motorcycle connection kit. The batteries can then be recharged while you're heating the gloves. The 7.2-volt, 2.2 Ah batteries reach a full charge in just 4 hours with the dual charger provided. They can remain in their pocket within the glove while they're being charged.

When you ride, the temperature drops as you speed up. This is what you call wind chill. At 90 km/h and a 10°C temperature outside, it can rapidly feel below freezing if you're not wearing the right equipment. This is why heated gloves, and the FIVE HGs in particular, are becoming so popular for winter motorcycle rides.

STREET

**WOTRU** 

MAIL, ADVENTURE

#### DUAL CONTROL, OR HOW TO MAKE IT EASIER AND SAFER to adjust your heated glove controls.

The new DUAL CONTROL system developed by FIVE wants to make starting up and adjusting your HG heated gloves simpler and safer than ever.

Starting from the premise that the less you let up on the handlebars and controls, the safer your riding will be, we've designed a system that allows you to control the heating and adjust both of your gloves while you keep your right hand on the controls, on the throttle and front brake, which are essential elements for keeping your motorcycle under control. Placed on the cuff or the back of the right hand, depending on the style, the DUAL CONTROL button allows you to activate the heating on your gloves and adjust its level, cycling through the three levels by simply pressing repeatedly with your left index finger. The two gloves are connected using electromagnetic waves. The LED screen on the left glove displays the 3 levels of heat available, as well as the one selected, and the LED battery indicator on each hand allows you to know how much power you have left to heat each glove.

The FIVE Dual Control system, simpler and safer, allows you to stay focused on the road by keeping a hand constantly on the handlebars. It takes our new heating technology, and, especially, the riding experience, to a new level of efficiency and ease of use under wintertime conditions.

WINTER

# TE STING OCU

## HG PRIME GTX

The ultimate GORE-TEX® heated glove.

To make what we consider the best heated glove we've ever produced, we started with the construction of our highest-performing winter glove, the WFX Prime GTX, borrowing all its signature comfort and protection from the cold, rain, and impacts, then adding in our brand-new HG Dual Control heating system. With this system that allows you to control the level of heat in both gloves using a single button on the right hand, we've focused on making riders' lives easier and optimizing their safety.

This way, your right hand can stay on the controls (throttle and front brake), ensuring a safer experience when you change the level of heat while you ride. For effective protection from bad weather, the HG Prime GTX features a GORE-TEX® Grip™ weatherproof, breathable membrane bonded to the palm of the glove. It's nothing less than the highest-performing membrane on the market; its specific construction offers incomparable grip on the handlebars and precision at the controls.

The heat-sealed, seamless topside construction of the HG Prime GTX, in addition to its ultra-modern look that reminds us of extreme-sports apparel, further enhances its protection against water, wind, and cold. In terms of thermal insulation, and to ensure that the glove protects you from low temperatures even when the heating system isn't activated, we've called upon the expertise of Primaloft®, the absolute benchmark in the industry, and its Primaloft Gold™ insulation. (The HG Prime GTX is the only glove in the range to offer a 200 g version instead of the 170 g that the other styles have). Less bulky but more insulating than most, it traps the natural heat from your hands. Since it's also water-repellent, it doesn't take on water or moisture of any kind. And most importantly, it offers excellent protection against the cold without making the glove too bulky, which is a real advantage when you ride.

The HG Prime GTX naturally features all the safety (Ergo Protech\*\* protective shells) and comfort (Touch Screen\*\*, Clear Vision Pad\*\*, etc.) elements that are typical of new-gen FIVE gloves. The HG Prime GTX is also one of the first, if not the first, battery-heated glove to include a GORE-TEX® membrane, which, in itself, already makes this an exceptional piece.

It's sure to satisfy the most demanding riders and will surprise you with its extreme comfort and performance. With its ultra-modern design, the HG PRIME GTX is THE ultimate premium heated glove.

## HG1 EVO WP

The all-leather heated glove.

The HGI Evo WP replaces its predecessor, the HGI WP, which had been our top-ofthe-range heated glove, offering the latest generation of Dual Control heating technology. It offers a real advance, both in practical and aesthetic terms, with its ERGO PROTECH® protective elements that are featured in a number of our new styles.

It's designed for those who consider leather to be the safest material to protect you if you hit the ground, or if the temperatures drop. Its topside construction and palm are covered in supple full-grain goat leather, making it an elegant, protective, and suppremely comfortable glove.

With Dual Control, which allows you to control the level of heat for both gloves using a single button on the right hand, we've focused on making riders' lives easier, and their rides as safe as possible. This way, your right hand can stay on the controls (throttle and front brake), ensuring a safer experience when you change the level of heat while you ride.

The new-gen plugs within the glove allow you to connect to your motorcycle battery quickly and easily, using the optional Connection Kit\*, so you can recharge your gloves' batteries on the go. Because sometimes, you have to wear a heated glove in the rain, the HGI Evo WP features a S\_DRYTECH™ weatherproof, breathable membrane, developed by FIVE to keep your hands dry.

A heated glove should be comfortable even when the heating system isn't activated. So, we've called upon the expertise of Primaloft®, an absolute benchmark in the industry, with their Primaloft Gold™ insulation. Less bulky and trapping more air than most insulation, it's more effective at retaining the natural heat from your hands. Since it's also water-repellent, it won't take on water or moisture of any kind. This is why Primaloft® is the gold standard for mountaineering apparel.

The HG1 Evo WP features, of course, all the safety (Ergo Protech\* protective shells) and comfort (Touch Screen\*, Clear Vision Pad\*, Pull'n'ride\*) features that are typical of new-gen FIVE gloves.

HG1 Evo WP is made for those of you who consider leather the noblest of materials, and electricity, the best of all inventions.

## HG2 EVO WP

The combined leather-and-nylon heated glove.

The HG2 Evo WP is such a balanced product that it's destined to become a bestseller within our range of heated gloves.

It features same characteristics as those of our premium products (Primaloft® thermal insulation, 5\_DRYTECH™ weatherproof, breathable membrane, Dual Control adjustment system, etc.) and makes FIVE Heating Technology affordable, with its mixed construction that blends a palm in full-grain leather with a nylon topside. Could this be the perfect mix?

With Dual Control, which allows you to control the heat level of the two gloves using a single button on the right hand, we want to make riders' lives easier and optimize their safety.

This way, your right hand stays on the controls (the throttle and front brakes), guaranteeing a safer ride when you need to adjust the heat level on the go.

The new-gen plugs inside the glove allow you to connect quickly and easily to the motorcycle's battery, using the optional Connection Kit\*, recharging your gloves' batteries while you ride.

And because sometimes, you need to wear a heated glove in the rain, the HG2 Evo WP features a 5\_DRYTECH\* weatherproof, breathable membrane developed by FIVE to keep your hands dry.

A heated glove should also be comfortable, even when the heating system isn't activated. So, we've called upon the services of Primaloft®, an absolute benchmark in the industry, with their Primaloft Gold™ insulation. Less dense and trapping more air than most insulation, it's more effective at keeping in the hand's natural heat. Since it's also water-repellent, it doesn't take on any water or moisture. This is why Primaloft® sets the standard in mountaineering apparel.

The HG2 Evo WP naturally features all the safety (Ergo Protech\*\* protective shells) and comfort (Touch Screen\*\*, Clear Vision Pad\*\*, etc.) features that are typical of newgen FIVE gloves.

The HG2 Evo WP is designed for those who demand top-quality, high-performance equipment that will take them far and last a long time, while offering value for money that's beyond compare.

# HG3 EVO WP

The fully synthetic heated glove.

The HG3 Evo WP features all the safety (Ergo Protech\*\* protective shells) and comfort (Touch Screen\*\*, Clear Vision Pad\*\*, etc.) elements that are typical of new-gen FIVE gloves. So, you may choose the HG3 Evo WP because it's financially attractive, or because it resonates with your values, since no elements of animal origin have been used in its composition...or for both reasons! In addition, women will appreciate having a version of the HG3 Evo WP that's made for their shape, size, and sense of good taste. Available in men's or women's versions.

# RFX1 WOMAN

Premium racing gloves for fast ladies.

Racing glove designed for the racetrack and sports bikes. The RFX1 includes ventilated PU knuckle shells and a large carbon-fibre shell to protect the forearm. It offers all the features of a top-of-the-line glove geared towards performance. Kevlar® lining, carbon reinforcements and full-grain leather for protection, Stretch Kevlar® for comfort, a protective barrier for both the palm and the top of the hand, while providing an exceptionally lightweight fit. The velcro adjusting tab is concealed beneath a leather protective flap to reduce the risk of the glove being torn off in the event of a fall. This top-of-the-range Racing glove will delight demanding riders of sports bikes, who favor control sensitivity and fit, without over looking safety.

- Full-grain cowhide construction (topside) for durability / Full-grain goatskin (palm) for suppleness
- Ventilated PU metacarpal-knuckle protective shells.
- 83. Protective Carbon palm slider shell
- 84. Palm reinforcement in digital leather
- Thenar muscle (palm) reinforcement, with a SuperFabric® patch
- 86. Internal Kevlar® lining
- Outer stitching on the fingers (Cuterman threads)
- 88. Carbon protective shell on the forearm

- 89. Stretch Kevlan® comfort panel (topside)
- 18. Dual closure system
- Shape and size adapted to the feminine form

## RFX SPORT WOMAN

Your daily Sport.

New for ladies, the RFX Sport is now the entry-level style for our Racing styles. It's more focused on comfort than performance, and is designed for riders looking for an effective, accessible glove for everyday riding on a sport or road bike. It offers a more-than-satisfactory level of protection and comfort for road use, with its goatskin construction, main one-piece PVC shell concealed underneath the leather (perforated for an energetic look), multiple foam reinforcements, and TPR hypothenar protective shell. It deliberately retains a relatively classic look for a sport glove, so it can be your perfectly discreet companion from the road to the office.

- Full-grain goatskin construction (topside and palm) for extreme suppleness.
- #2. PVC metacarpo-phalangeal protective shells under leather (perforated for a great look)
- 83. Stretch comfort gusset over the wrists
- 04. External stitching on the fingers
- Palm and ring and little finger reinforcements in synthetic leather
- 86. TPR hypothenar protective shell (palm slider)
- 87. Dual closure system with an adjustment tab under a protective flap
- Øil. Forearm protection from foam reinforcement under leather
- Index, middle, little finger and thumb knuckle protection from foam under leather
- 18. Reflective night-time visibility panel
- Shape and size adapted to the feminine form

# KANSAS WOMAN

Our most protective custom glove.

The Kansas stands out as our most protective custom glove. Featuring a one-piece metacarpal protective shell inserted underneath the leather, and several reinforcements on exposed zones, it offers extra comfort and exceptional adjustability and touch sensitivity on the controls, due to, among other elements, its outer stitching. Its countless details, comfort gussets and topstitching, double closure with a zipper and leather and velcro flap, or its incredible level of finishing, make it a piece that leather lovers who want to look good will appreciate, without neglecting their safety. The Kansas marvelously combines classic style with a modern touch, since its index finger hosts the Touch Screen\*\* system that allows you to handle touchscreens without removing your glove.

- Total full-grain goatskin construction for suppleness (palm and topside), perforated for ventilation (topside)
- One-piece PVC metacarpal-knuckle protective shell underneath the leather
- 03. Outer stitching on the fingers for optimal fit
- Closure and adjustment system with zipper + velcro tab and or/off pull tab
- 85. Leather accordion comfort panels on fingers and thumb
- Accordion leather \* Elastic cuff for greater comfort.
- Hypothenar muscle protection with full-grain cowhide reinforcement panel and memory foam featuring embossed logo
- Touch Screen's system on index finger for handling touchscreens
- Shape and size adapted to the feminine

## COLORADO WOMAN

Back to basics.

When it comes to all things Eustom, we often only remember the essentials, the basics of motorcycling: a chassis, an engine, the controls, and two wheels are all we need to be happy. The same thing applies to the Colorado. In other words, when less truly becomes more... Less panels, less stitching, less protective elements, for greater comfort and control sensitivity. Inspired by a minimalistic approach that's straight out of Japan, the Colorado reminds us of the automotive gloves of the 1960s. The suppleness of full-grain leather invites you to ride your bike subtly and skillfully. Its second-skin smoothness, enhanced by its distinctive construction (with middle and ring fingers separate from the rest. of the structure, and one long outer seam around the fingers), will make you feel like you're wearing nothing at all. But the sturdiness of the cowhide will save your hands if you happen to take a spill. Its adjustment tab adorned with a metallic grommet positioned over the wristband adds to the comfort and sleek look of the Colorado. This is a glove you'll choose more for its feeling of freedom than for the protection it provides, there no doubt about it.

- Full-grain cowhide construction (topside and palm), for durability
- 82. Quilted foam hypothenar reinforcement, underneath the leather on the palm side.
- Distinctive construction, with the middle and ring fingers separate from the rest of its main structure
- 84. One long outer seam on the fingers, and thumb, for optimal fit.
- Multiple leather perforations on the top of the fingers, for style and ventilation
- 86. Metallic grommet and FIVE Custom embroidered label
- Comfort gussets on the inside of the wrist
- 88. Topside closure and adjustment system, featuring a leather and velcro tab
- Shape and size adjusted to a woman's frame

# MUSTANG EVO WOMAN

The evolution of a bestseller.

The Mustang used to represent the "little Custom leather glove that everyone likes", with its minimalist aesthetic, ultra-compact size, and delicate comfort. Allow us to introduce the Mustang Evo, an optimized and updated version of this iconic style. We've totally redesigned it, using our new, exclusive palm-to-thumb construction, for a fit that's even more precise and comfortable. It's made in 100% full-grain goat leather, renowned for its suppleness and perforated for better airflow and sweat evaporation. The Mustang Evo has opted for a subtle look, with its protective shell hidden underneath the leather and its large insert adorned with a FIVE Custom logo embossed on the palm. Its closure system is now placed on the inside of the wrist, which makes for easier handling with a more intuitive feel and a tab that's less likely to open unexpectedly. Safety has been reinforced by subtly lengthening the glove for better wrist coverage, without changing the "ultra-short" character that made the Mustang so successful. It's been a logical, practical evolution, with the addition of the Touch Screen™ system that allows you to handle device touch screens without taking off your gloves. The Mustang Evo is sure to go perfectly with any Custom or neo-retro machine or even with more conventional motorcycles, since it's so alluring, with its universal, timeless style. Available in Men's or Women's versions.

- Perforated goat leather topside construction
- 82. Supple full-grain goat leather palm
- TPR metacarpal-knuckle protective shell underneath the leather
- 84. Leather palm reinforcement
- 85. Embossed FIVE Custom logo
- 86. Touch Screen" system on the index finger

# TFX2 WOMAN WP

For farsighted adventurers.

The TFX2 is made for adventurers who leave nothing to chance, And, in particular, for those who demand a protective and comfortable glove that allows them to ride worry-free on any type of road, or face anything that Mother Nature can throw at them. Because when you set off for adventure, you may set off under bright sunshine, and finish the day in the driving rain. With its water-repellent, laminated fabric construction and its 5\_DRYTECH\*\* weatherproof/breathable membrane, it offers unparalleled dryness, while allowing for a healthy evaporation of perspiration, which often happens when you ride hard on unpaved tracks. The TFX2 offers many details that are essential for long rides, like the Clear Vision Pad™visor-cleaning system, or the Touch Screen™ electronic device-handling system, which allows you to find your way easily using your GPS or smartphone, without taking your glove off. And we haven't skimped on protection here, either, with its PVC shell and numerous reinforcements, on the topside, and its wide Kevlar® panel on the palm side, covering from the base of the hand all the way up to the hypothenar, under which three foam elements are inserted, for comfort. The palm also features a Digital PU reinforcement for impeccable handlebar grip when it rains. Comfortable, lightweight, and tough, both on falls and on rainstorms, the TFX2 will be there, ready to take on any adventure.

- Stretch, water-repellent fabric construction (topside), for dryness and comfort / Full-grain goat leather (palm), for suppleness
- 5\_DRYTECH\* weatherproof breathable membrane
- One-piece PVC metacarpo-phalangeal protective shell underneath the fabric / Window-panel construction
- 84. Soft TPR index and middle-finger knuckle protection.
- Index and middle-finger comfort gussets, with reflective inserts
- Protective foam reinforcement on all knuckles
- 87. Forearm protection from a cuff with integrated memory foam

- Wide Kevlar® reinforcement, from the base of the hand, all the way up to the hypothenar
- Digital PU paim reinforcement, for better grip on the handlebars
- Dual closure system (wristband and cuff) using an elastic strap and velcro
- Adjustment tab concealed underneath a Keylan® panel
- 12 Retro-reflective fabric on the wristband
- Lycra®-style fourchettes (between the fingers)
- Clear Vision Pad<sup>re</sup> visor-cleaning system on the left-hand side
- Touch Screen\* system (on the index finger) for handling electronic devices

## TFX4 WOMAN

For new adventurers.

The TFX4 represents the entry-level style in the FIVE Trail-Adventure range...in every sense of the word! Accessible, because it's inexpensive, easy to wear, and because it meets all your basic needs for paved or dirt-road use. Lightweight, comfortable, and sleek, it is nevertheless quite protective, with its dual ERGO PROTECH® soft shell and wide Kevlar® panel covering nearly half of the palm, made of synthetic leather. Indeed, the TFX4 features no elements of animal origin, to the delight of vegan adventurers. A silicone print on the index and middle fingers improves your grip on the controls in wet conditions. The use of water-repellent fabric on the zone around the protective shells allows the water to slide over this area, in case you get splashed when you cross a river or get peppered by unexpected light rainfall. The TFX4 is, admittedly, not weatherproof, but this makes it even more versatile. This is a glove you'll reach for when you want to travel light, yet it has so many possible uses. From a ride on a sun-drenched road, to a jaunt on a gravel run in much less predictable circumstances, the TFX4 is always ready to head off for adventure.

- B1. Mixed stretch, water-repellent fabric and 4-way Spandex\*\* construction (topside)
- 82. Synthetic leather palm
- 83. Dual soft-TPR ERGO PROTECH® metacarpo-phalangeal protective shell
- Wide Keylar® reinforcement, from the base of the hand all the way up to the hypothenar
- 85. velcro closure tab and base of the thumb in Airprene® fabric, offering both support and vertilation Lycra®-style fourchettes (between
- 86 the fingers)
- 87. Touch Screen" system (on the index finger) for handling electronic device screens
- 88. Anti-slip silicone print on the index and middle fingers, for better grip on the controls
- Deflector flap in retro-reflective fabric on the top of the hand
- 10 Heat-welded FIVE sonic logos that act as protective elements

## STUNT EVO 2 WOMAN

The STUNT, original version.

This is clearly the most common, new-gen iteration of the STUNT concept invented by FIVE. Its topside construction in tough stretch Twill Span fabric contributes greatly to the exceptional comfort of this iconic style. It features exceptional protection, given the second-skin feel it offers, with its AirgoProtech\* shells inspired by helmet technology (see previous pages), featuring a particularly innovative design. Its 100% full-grain goat leather palm, which is both supple and durable, feels so smooth and soft to the touch...And yet, it offers excellent grip on the controls and hosts a leather reinforcement lined with an ERGO PROTECH® semi-soft, honeycombed protective shell that offers a reassuring feeling of safety, without hindering your movements in any way. With its signature look, the STUNT EVO2 offers its rider a certain kind of status: that of an avant-garde design aficionada, even offering the feeling of being truly on the cutting edge, even ahead of the curve.

- 81. Twill Span stretch topside construction
- 82 Full-grain goat leather palm.
- Ventilated AirgoProtech\* metacarpalknuckle protector
- 84. ERGO PROTECH® honeycombed palm slider
- 85. TPR finger protection with air intake vent
- 86 Softshell thumb construction for optimal finesse and comfort.
- Ultra-tough stretch Nylon fourchettes between the fingers
- 88 Ergonomic, fused neoprene wristband with integrated velcro closure

The multipurpose urban glove.

Totally redesigned in 2022, the RS3 EVO is meant to replace one of the most popular FIVE gloves, the RS3. Made for multipurpose urban use and designed for riders looking for a short, functional, comfortable, and affordable glove that offers a reasonable level of protection, the RS3 EVO is a basic you just can't live without, whether as your go-to glove or as a spare for a passenger. It features the very latest FIVE ERGO PROTECH® ergonomic protective shells for greater comfort and effectiveness, and its 4-Way Spandex\*\* topside construction gives it both excellent fit and major flexibility. Easy to slip on and take off, it's perfect for riders zipping all over town throughout the course of a day. It will be your faithful companion on your everyday urban rides at the controls of any type of machine. Could the RS3 EVO be setting the new standard in its category? All you have to do is try it, and you'll know it's true.

## GLOBE EVO WOMAN

The new-gen multipurpose urban glove.

The Globe Evo represents a significant evolution for the Globe, our style focused on meeting the essential needs of urban motorcycle and scooter riders looking for a super-affordable and practical glove. The Globe has been a top seller worldwide and has quickly become a must-have basic. The Globe Evo takes up the straightforward qualities of its predecessor, upgrading it with the latest generation of ERGO PROTECH® ergonomic protective shells and a new fit that makes it even more comfortable. It features just what you need to ride safely and comfortably in the city. With its updated construction and dynamic look, there's no doubt that the Globe Evo will set a new benchmark in the entry-level segment. It offers the Touch Screen® system on the index finger, so you can handle device screens, and its "no-leather" composition is sure to delight our vegan friends. The Globe Evo is THE ultimate affordable, versatile glove. Choose it as a main pair or an extra one for your passenger (it comes in both men's and women's versions).

## WFXSKIN EVO WOMAN GTX

The new all-leather urban & touring GORE-TEX® winter glove.

The WFX Skin Evo GTX represents an alluring evolution of the WFX Skin GTX, our bestselling urban/suburban winter glove. Though its predecessor was essentially designed for city riders, the WFX Skin Evo GTX wants to be more versatile. It widens the riding spectrum and will also delight Touring fans looking to have an understated, comfortable, and elegant leather glove to face the winter.

Made mostly of full-grain Napa goat leather, renowned for its extreme suppleness. with the addition of a few stretchy Softshell fabric inserts for ease of movement and comfort, it aims to be protective, in every sense of the word, in the city or on the road. Its GORE-TEX® weatherproof, breathable membrane and PrimaLoft® Gold water-repellent thermal insulation offer the best possible guarantee that you'll stay dry and warm in bad weather; this is why we've opted to use these premium elements on the WFX Skin Evo GTX. And to stop any raindrops from getting inside your sleeve, the cuff is now covered with Taslan™ water-repellent fabric, for truly optimized weatherproofing.

In terms of safety, the WFX Skin Evo GTX has naturally adopted the latest generation of FIVE ERGO PROTECH® ergonomic protective shells, including a semi-soft, honeycombed shell on the palm, to protect you in case you take a spill. The topside shell is simply concealed underneath the leather, for a more subtle look. The dual-closure system also promises perfect fit and support. We've obviously also offered you the ability to handle your touchscreen devices and wipe off your visor while you ride with the WFX Skin Evo GTX, which features the Touch Screen\* and Clear Vision Pad\* systems.

Discretion and protection (against the cold, rain, and any falls) are the key concepts that we had in mind when we developed the WFX Skin Evo GTX.

As you can see, here, we're in the presence of a refined and comfortable glove that will take you elegantly and effectively from the city during the week to the road on the weekends, all winter long.

Available in men's or women's versions.

- Napa goat leather + softshell topside construction
- 82. Full-grain goat leather palm
- GORE-TEX® weatherproof/breathable membrane

- Touch Screen\* system on the index finger and thumb
- 11 CE KP1

# WFX SKIN EVO WOMAN GTX

# WFX FROST WOMAN WP

The short winter glove to take on long winters.

Because you might want to ride in the cold without getting weighed down by a long glove, we present FROST, a short glove designed to take on the coldest of winters. It combines a topside in weatherproof stretch fabric with a full-grain goatskin palm. Non-bulky, but warm: the thermal insulation is covered by a 180g Thinsulate<sup>re</sup> internal lining and ribbed cuffs. Comfort lining in synthetic fur, on the top of the hand, makes FROST soft and cozy.

- Weatherproof stretch fabric construction (topside) for weather-resistance and comfort / Full-grain goatskin (palm) for suppleness
- Thinsulate<sup>w</sup> 180g thermal insulation fining
- 83. HIPORA® weatherproof membrane
- 04. Bemberg<sup>as</sup> internal comfort lining
- TPR one-piece metacarpal-phalangeal protective shell underneath fabric
- Hypothenar protective shell (palm slider) in TPR
- Non-slip large-mesh synthetic leather palm reinforcement.
- 88 Reflective print for night-time visibility
- Touch Screen\* system (on index finger) for handling touchscreens
- Shape and size adapted to the feminine form

# MILANO EVO WOMAN WP

Simple, understated, and efficient.

The Milano Woman, our weatherproof, breathable urban glove designed mainly for mid-season scooter riding, has been completely restyled in 2021. Fully updated, it still retains the characteristics that made its predecessor a real success. It features a protective shell concealed underneath nylon fabric and a leather palm, promising absolute protection. It also features a weatherproof, breathable 5\_DRYTECH\*\* membrane, thus offering a layer of thermal insulation to protect its rider from the cold. Sleek and subtle, the new Milano Evo Woman retains its fashionable look, making it the perfect companion for elegant occasions, worn underneath a raincoat.

- Synthetic fabric (topside) and full-grain goat-leather (palm side) construction
- PVC metacarpophalangeal protective shells underneyth the fabric
- 83. Internal 5\_DRYTECH\*\* weatherproof, breathable membrane
- 84. Thermal-insulating foam
- Memory-foam hypothenar protection underneath the leather
- 86. Leather palm reinforcement
- Closure system with synthetic leather and velcro tab
- 88. Touch Screen\* system for handling electronic devices (on the index finger)

BLACK XS-07/S-08/M-09 L-10/XL-11 Special woman sizes

# WFX4 WOMAN WP

Effective yet affordable, the new winter glove for everyone.

The WFX4 WP is our new entry-level offering and seeks to make the key features that make winter gloves effective in the city or on short rides, affordable and accessible to all (men, women, and children), with quality fit as a bonus (the famous FIVE fit)! It features 170 g 5\_WARMTECH™ thermal insulation on the topside of the hand, which is lined with insulating foam on the palm side, to effectively protect your hand from the cold. And since it's better to be prepared for humidity or rain, which are more common in winter, the WFX4 WP also has a waterproof, breathable 5\_DRYTECH\*\* membrane, developed specifically by our R&D department for motorcycle use, which is also partially bonded to the palm for optimal grip on the handlebars and perfect fit. Its "no-leather" construction (topside construction in water-repellent Softshell fabric and the palm in Amara synthetic fiber) makes it a 100% vegan product, which should delight anyone who cares about animal welfare. Like its more advanced siblings, the WFX4 WP offers the latest-gen-

eration ERGO PROTECH® ergonomic shells, developed by FTVE, ensuring excellent protection without hindering your movements. Ultra-practical, the Touch Screen® system on the index finger allows you to use your GPS or smartphone touchscreen without taking your gloves off.

As a main pair for budget-conscious riders, or an extra pair to keep in your top case, the WFX4 WP is an interesting and affordable base product to help you keep riding your motorcycle or scooter in the winter. There's no doubt about it. it's the one to take out as soon as temperatures start to drop.

- Saftshell topside construction
- 82. Amara synthetic leather palm
- 83. 5\_DRYTECH\* weatherproof, breathable membrane
- 84. 5\_WARMTECH\* 170g thermal insulation on the topside
- 85. Insulating foam on the palm
- ERGO PROTECH® metacarpal-knuckle protector
- 87. ERGO PROTECH® palm slider
- 88. Velcro wrist closure

## MXF PRORIDER S

The ultimate MX glove.

This is the latest generation of motocross gloves built based on the experience of MX or Enduro Grand Prix FIVE riders. Even more lightweight, thin, elastic, and breathable in their "S" version than the original MXF PRORIDER. The topside is made from a single piece of YP Mesh. Finger contours are in small Airmesh. Everything is done to create unparalleled fit. Finger protection and Sonic" FIVE logo. The thumbs feature comfort gel at grip contact points in order to reduce the risk of blisters. Gel pad protection at palm to dampen shock and impact in a fall. Palm made of Nanofront®, a material coming from Japan introduced by FIVE on an MX glove, offering an unrivaled level of control feel and grip. Lycra® gusset for comfort under the TPR and velcro adjustment tab, to prevent dirt from getting inside the glove. The ultimate in MX gloves.

- YP Mesh\*\* construction (topside and thumb) for ventilation and fit / Nanofront® (palm) for improved grip and exceptional steering precision
- 82. Fourchettes (finger contours) in 22 Mesh\* for improved airflow
- 83. Metacarpal and knuckle protection with TPR Sonic<sup>™</sup> patches and 30 logo
- 8< Hypothenar muscle protection with a gel panel under Nanofront®
- 85. Gel inserts at points of contact and anti-blister palm lining
- 86. Closure system with TPR: + velcro tab and Clarino® puller tab

## MXF3

Extreme ventilation for extreme riders.

An ultra-ventilated motocross glove. Palm in synthetic leather. Topside in large Mesh for improved airflow. TPR and velcro adjustment tab. Finger contours in Heavy Lycra®. And some clever visual appeal from our designer: the Sonic FIVE logo on the top of the hand is designed to be "legible" from afar, but not necessarily from close-up.

### TECHNICAL FEATURES

- Wide-cell Mesh + 2-Way Spandex<sup>re</sup> construction (topside and thumb) / AX Suede® synthetic leather (palm)
- 82. Lycra® fourchettes (finger contours)

83. Closure system with TPR + velcro tab

## **NEO**

The new "Neo" glove for winter training.

The NEO gets its name not just from its newness, but also from the small glove known as a "Neoprene" that you should always have in your bag for winter motocross training or cool morning/evening bike rides. It's not, strictly speaking, made of Neoprene". Its Lycra® Fleece construction feels even more pleasant and comfortable than simple Neoprene", because it's thinner and less constricting. It acts as a slim barrier against the wind and cold, while retaining a flexibility that leaves your movements, and your precision at the controls, unhindered. Beyond insulating and retaining your hand's natural warmth, the NEO proves its effectiveness with a number of elements, such as the silicone prints on the inside of the palm, index, and middle fingers, for optimal grip on the controls, and its Clear Vision Pad", to wipe off your face mask, or Touch Screen's systems, for handling electronic devices (smartphone or GPS). With the NEO, riding off-road in winter and braving the elements will swiftly become a real pleasure. Though it's designed for training, some riders will make it their secret weapon for competitions under extreme conditions.

- Lycra® Fleece construction to block out the cold and wind (topside)
- AX Suede® Cinco synthetic leather that combines comfort and excellent grip (palm side)
- Silicone prints on the index and middle fingers and on the palm, for grip on the controls
- 84. Embossed Neoprene<sup>re</sup> wristband with integrated velcro adjustment tab
- Duter part of the thumb in Clear Vision Pad<sup>ne</sup> micro-terry foam, for cleaning off your face mask
- Fourchettes (between the fingers) in water-repellent Lycra/B
- 87. Pull'N'Ride on/off tab integrated into the wristband
- 88. Touch Screen\* system (on the index finger) for handling electronic devices
- 89. FIVE embossed or retro-reflective logos

### E2

#### The gloves specifically designed for recreational and competitive Enduro. CE certified!

We proudly present the result of our collaboration with seven-time Enduro World Champion Steve Holcombe, and 2019 E2 World Champion Loic Larrieu, after many months in development: the E2, a glove designed specifically for Enduro, both recreational and competitive. It offers all the performance of a motocross glove, combined with a superior level of protection that's essential in the great outdoors. This includes branches and rocks that can sometimes be tough on riders, because you're not always protected by handguards. particularly if you take a spill. So, we've included just the amount of reinforcements and protection you need at strategic points, so you maintain total freedom of movement. This is what we're talking about with the dual-shell ERGO PROTECH® in soft TPR, which'll protect you from tree trunks or rocks, but is also nearly undetectable when you're at the controls. We've really focused on ventilation, with mesh fabric on the inner half of the hand, while we've kept the tougher materials on the outer half that's more exposed to all kinds of contact (with trees, thorns, rocks, etc.). And since Enduro means you spend long hours at the controls, navigational contact has to be comfortable. The E2 is thus equipped with a palm in AX Suede® Novobuck\*\*, a material that provides excellent grip and is both durable and comfortable, along with 2 mm foam rubber pads on the palms and 3 mm on the thumbs. You get the picture: with the E2, FIVE offers an Enduro-specific glove that's bound to set the standard...

- 81. Topside: Mixed construction, with ventilated mesh on the inner side / extra-tough 4-way-stretch polyester on the outside / Palm: AX Suede® Novobuck\*\* / hypothenar and control contact-point reinforcement in synthetic leather / 2 mm foam rubber reinforcements on the palms / 3 mm foam rubber pads on the thumbs
- 82. Dual ERGO PROTECH® protective shells in soft TPR, virtually undetectable
- 83. Mini-protective shells in TPR on the fingers
   + 3 mm foam rubber reinforcements.
   on the ring and little fingers
- 84. 5 TPR Sonic heat-sealed protective logo

- FIVE ErgoFit construction for optimal fit and freedom of movement.
- Synthetic leather reinforcement on the edge of the hand, up to the radius
- Silicone print on the inside of the fingers for optimal grip
- 88. Clear Vision Pad<sup>®</sup> visor cleaning system on the left-hand side
- 89 Touch Screen\* system (Index finger) for handling electronic devices
- 10 Adjustable tab closure integrated into the mesh and velcro fabric structure of the glove

## E3 EVO

### The Five entry level enduro glove, CE certified!

The E3 style thus gives you access to a FIVE Enduro range that keeps expanding. CE certified for open-road use, as certain regulations require, the E3 EVO features a metacarpal-phalangeal protective shell in soft TPR, concealed under mixed Spandex\* / Polymesh construction. While this shell promises protection in case of contact with pebbles, branches, or if you take a tumble on the open road, these two materials give the E3 EVO extreme flexibility, so that nothing hinders the mobility of the rider's hand. A synthetic leather reinforcement ventilated at the point of contact with the handlebars seeks to reduce the risk of thumb blisters. Similarly, the palm in AX Suede® Novobuck is reinforced on the hypothenar muscle with a synthetic leather inset and features a silicone print for optimal grip on the controls. Slip-on and closure are made easy with the inclusion of a pull tab (on the palm side) and an adjustable velcro flap integrated into the glove's construction. The E3 EVO proves to be extremely lightweight despite its one-piece protective shell, and even includes a Touch Screen\* system on the index finger, allowing you to handle your device screens (smartphone or CPS). It's all more than enough to satisfy Enduro lovers and ramblers who are exacting, but frugal.

- Sublimated Spander\* and Polymesh construction (topside) / AX Suede® Novobuck (palm)
- Soft TPR metacarpal-phalangeal protective shell concealed under fabric
- 83. Soft TPR phalangeal mini protective shell (index, middle, ring fingers)
- 84. Synthetic leather reinforcement on the hypothenar muscle
- 815. Synthetic leather thumb reinforcement, at the zone of contact with the handlebars.
- 86. Silicone print on the palm to enhance grip
- Fourchettes (finger contours) in Heavy Lycra® to boost flexibility and airflow
- 88. Closure system with velcro flap and oull tab
- Touch Screen\* system for using device screens (CPS, smartphone)
- 18. CE certified (open-road use)

### E-WP

The off-road glove to help you face the wind and rain.

Because off-roading (Enduro, quad, ATV) is fun year-round, including when the weather's bad, you have to be equipped and ready for anything. FIVE is proud to introduce the E-WP, an off-road glove that features a S\_DRYTECH™ breathable, weatherproof membrane and a water-repellent stretch outer shell. This glove is truly effective and comfortable when you have to face the wind and rain, which is sometimes a reality when you're on long rides in the great outdoors. Made from tough, durable materials that are moisture- and abrasion-resistant, the E-WP should always be in your belt bag or backpack when the weather's likely to take a turn for the worse, so you can keep on rolling with your hands dry, at the first sign of rain. Its synthetic leather AX Suede® embossed palm, for enhanced grip on wet, or even mud-splattered, controls, offers excellent navigational control and significant comfort, especially when hours of riding seem endless in the pouring rain. With its Touch Screen\*\* system and Clear Vision Pad", you'll always be able to use your GPS or wipe off the outside of your visor, to help you find your way. You may end up exhausted and soaked from head to toe...but your hands will stay nice and dry inside the E-WP.

- Topside: Water-repellent stretch fabric construction / Palm: AX Suede® synthetic leather, embossed for perfect grip in wet conditions
- 82. 5\_DRYTECH\*\* breathable, weatherproof membrane, partially bonded on the palm.
- 83. Dual ERGO PROTECH® protective shell in soft TPR, nearly undetectable
- 84. Synthetic leather reinforcement on the thumbs
- Fourthettes (bands between the fingers) in Heavy Lycraffi
- 86. Pull'N'Ride" pull tab
- 87 TPR and velors tab closure

- Lycra® wrist gusset that keeps dirt from getting into the glove
- Internal Bemberg\* comfort lining
- 18 Comfort gussets on the top of the hand and on the index and middle fingers
- Foam reinforcements on the ring and little fingers
- Clear Vision Pad\* visor cleaning system on the left-hand side
- 13. Touch Screen® system for handling electronic devices (Index finger)

HEATTECHWOLDGY

WOMAN

All brands or products mentioned in this glassary are the property of the firms, suppliers, or partners of FIVE Glaves or of its manufacturing units, and are mentioned for informational purposes.

S\_DRYTECH\* – Weatherproof / breathable and windproof membrane developed by FIVE specifically for two-wheeled vehicles. Allows perspiration to evaporate, while it stops raindrops from getting into the glove. Attached to the external structure and the lining of the glove with adhesive strips, so that it really stays put.

AirGO PROTECH® — A protective shell crafted by FIVE, with a trademarked design, offering superior ergonomic and protective qualities, which includes an air inlet to promote ventilation of the hand.

Airprene® – Ultra-stretch polymer foam that offers excellent support, with a microcellular structure and perforations that ensure optimal air and moisture flow. We use it most often for the support and breathability it provides on the wristband.

Anti-twist ties – An element connecting the little and ring fingers, to stop the little finger from being x away from the hand in the event of a fall. Made from leather, in an accordion shape (a FIVE innovation) on our Racing gloves, in order to limit the range of motion without being constricting.

AX Suede® — A synthetic material made from polyester microfiber. An alternative to suede leather that offers the advantage of being machine washable. Designed to enhance functions such as dexterity, flexibility, skid resistance, moisture management, etc. Comes in many varieties, with many possible applications.

Bemberg\* / Micro Bemberg\* - An artificial textile fiber obtained from natural materials, including cellulose from a variety of botanical sources, and featuring a silky texture, used as a lining inside gloves in order to offer a pleasant and comfortable contact zone.

Carbon PVC — A protective element consisting of a carbon sheet between two layers of PVC, which gives it an optimal firmness/flexibility ratio. We often include a carbon PVC shell at the hypothenar, which we also call a palm «slider».

Carbon Thermoset – Thermoset carbon passed through an autoclave, originating from Italy. Used in aeronautics, Formula 1, and Moto GP. Used in the protective shells of our high-end Racing style, the RFX Race. Offers high skid resistance, extremely light weight, and an exceptional level of protection.

Cat Eye" – A polyester-based synthetic fabric with a structured upper surface.

Clarino® – A synthetic material that emulates natural suede leather, used on the palm side for its comfort, skid resistance, and excellent grip. Machine washable.

Clear Vision Pad\* - A micro-terry cloth fabric panel that allows you to wipe off your helmet's visor or mask while riding. (A FIVE brand name)

CONNECTION KIT – Optional cable-connection kit that allows for the connection of FIVE HG heated gloves to the battery or cigarette lighter socket on the motorcycle. Cordura® Stretch – Cordura®. A heavy-duty fabric that offers elastic qualities in its Stretch version.

**DUAL CONTROL** – Heating control system using a single button (implemented on the new generation of FIVE HG heated gloves) that allows for simultaneous control of the heating level in both gloves with a single button on the right hand, since both gloves are wirelessly connected.

Embossed – A textured effect that highlights a decorative element (logo or other).

ERGO PROTECH® – A protective shell crafted by FIVE, with a trademarked design, that can be visible or concealed under fabric or leather, offering superior ergonomic and protective qualities. Available in one-piece or double versions. The single-shell TPR versions include an internal honeycombed structure for optimal shock absorption. (A FIVE brand name)

GORE-TEX® GRIP Fully bonded – A weatherproof/breathable benchmark membrane offering superior weather-resistance and breathability, featuring the GUARANTEED TO KEEP YOU DRY ™ pledge. Fully molds to the shape of the palm for exceptional user comfort and enhanced touch sensitivity.

GORE-TEX® GRIP Partially bonded – A weatherproof / breathable benchmark membrane offering superior weather-resistance and breathability qualities, featuring the GUARANTEED TO KEEP YOU DRY™ pledge. Partially molds to the shape of the palm, so that it really stays put.

GORE-TEX® – A weatherproof/breathable benchmark membrane offering superior weather-resistance and breathability qualities, featuring the GUARANTEED TO KEEP YOU DRY™ pledge.

**CUTTERMANN®** – A stitching thread originating from Germany. Used on our high-performance gloves due to its superior tear resistance and ability to limit the risk of cuts in the event of an accident.

HG / Heating Technology — Heating glove. Heating technology. A glove that is heated by resistors and either a self-contained battery or mini-cigarette lighter power cord. It's possible to adjust the level of heat by favoring the perceived temperature or the battery life. (A FIVE brand name)

HIPORA® – A weatherproof/breathable membrane offering excellent weather-resistance and breathability.

Hypothenar – A part of the hand that includes a group of muscles that govern the movements of the little finger.

**KEVLAR®** – A synthetic fiber that is extremely resistant to tearing, perforation, and skidding, made from aramid resin. This high level of toughness makes it a material used in, as one example, the manufacture of bullet-proof vests.

Leather / Goat – Leather used to make our gloves, due to its superior suppleness.

Leather / Cowhide – Leather used to make our gloves, due to its superior toughness and durability.

**Leather / Digital** – Leather whose surface is laser-embossed to create a multitude of tiny prints to enhance grip on the controls in wet weather.

Leather / Full-grain - Leather that has its upper layer intact, thus featuring all the natural irregularities of the animal hide.

Lycra® - A synthetic fiber with elastic properties. We use it in the areas that require perfect elasticity, such as finger contours or the wrist opening.

Memory foam – A material made of viscoelastic foam that recovers its original shape when it is deformed. We use it in the zones that require impact absorption or as a comfort element.

Mesh Fabric - A honeycombed fabric that eases airflow.

Mesh Fabric 3D – A honeycombed fabric that eases airflow, with cells that feature a bulky texture.

Metacarpais - The set of bones that form the structure of the palm of the hand, located between the fingers and the wrist.

Nanofront® – A premium material from Japan, introduced by FIVE within the palm of our high-end motocross gloves, chosen for its exceptional anti-skid, slimness, suppleness, moisture absorption, and thermal barrier properties. Made up of fibers measuring 700 nanometers in diameter.

Nubuck - A leather finish that features a velvety effect obtained through scraping / polishing of its upper surface.

One Way Stretch\* - Stretch material that is inserted at the fourchettes zone (between fingers) of some models for optimal flexibility.

Palm reinforcement — Leather, fabric, or PU Grip elements that are designed to enhance the comfort of the glove on the palm side, its grip, and its chafe resistance.

Primaloft® – The best alternative to eiderdown, without its drawbacks. A high-performance thermal insulation material made from a trademarked synthetic microfiber. Developed in 1983 for the U.S. Army as an alternative to goose down, synthetic, insulating, and water-resistant. Offers a high level of comfort in cold weather by retaining the hand's natural heat. Available in different varieties and densities.

PU - Polyurethane. A flexible plastic material.

PU GRIP - A Polyurethane panel whose surface features hollow and textured dots that give it excellent grip in wet conditions material.

Pull'N'Ride\* – A pull-tab that makes slipping on a glove easier. (A FIVE brand name)

PVC – Polyvinyl chloride. A highly stable plastic material that exists in rigid or flexible forms.

Reflective – Reflective elements that mirror headlight brightness, to make motorcylists visible to others on the road during night-time riding. Spandex\*\* – A Lycra®-based synthetic material, renowned for its elasticity. Used to enhance elasticity over a specific part of the glove.

Spandex\*\* 4-Way — A Lycra®-based synthetic material, renowned for its elasticity. Stretches in 4 different directions (up-down and leftright). Used to enhance the overall elasticity of the glove.

SuperFabric® – A material that is highly resistant to skids and to sharp or pointed elements, made of a fabric base whose surface is covered with a multitude of textured resin dots that form a protective barrier. It is also weatherproof and breathable. We use it mostly on our high-performance gloves.

Synthetic Leather – For FIVE, a fine substitute for natural suede leather. Used mainly on the palm side due to its elasticity, durability, and comfort. Machine washable. A vegan material.

**Thenar** – The rounded, muscular mound on the upper part of the hand, underneath the thumb.

Thinsulate\* – A synthetic fiber and trademark of the 3M® company, offering thermal insulation properties. Derived from the English Thin and insulate. Available in different densities and weights for different parts of the glove and a variety of desired insulation/thickness ratios.

Touch Screen™ – The inclusion of elements that allow for the handling of touchscreens without removing your glove. It is most often found on the index or the index finger and thumb, depending on the particular style of glove. (A FIVE brand name)

TPR - Thermo-Propylene Rubber. A material that can be molded or extruded above its melting point. Used as a decorative or protective element on our gloves.

TPU – Thermo-polyurethane. A plastic material that can be variably firm or flexible, obtained through thermo-molding. We use it for some of our protective shells.

TT / Tourist Trophy — A motorcycle race that is regarded as the most dangerous in the world. It takes place over the roadways of the Isle of Man (UK). Official FIVE rider Peter HICKMAN, equipped with RFX Race gloves, holds the all-time average speed record for this race (218 km/h – 135 mph), and has claimed victories in all its categories.

V-Entrance<sup>™</sup> – A specific method of assembling the wristband elements, developed by FIVE to make it easier to slip on the glove. (A FIVE brand name)

Vegan friendly - A synthetic glove that contains no elements of animal origin in its composition.

Velcro® – A contact closure system using tiny hooks and textile loops, commonly known as \*scratch\* in French.

Water-repellent fabric – Fabric with a texture that allows water droplets to slip over its surface and thus slow their penetration into the glove.

WP – Weatherproof. A glove that features a waterproof, breathable membrane and can be used in the rain, because it keeps hands dry.
