YOUR SECOND SKIN

THE SECRET LIES IN THE FABRIC

ABOUT US

SIXS' history began in 2009 in Italy, in Bagnara di Romagna (province of Ravenna) to be more precise. An overwhelming love for sports and an in-depth knowledge of textile technologies combined together to give rise to the company. The result is a patented, extremely innovative fabric sold on the world market of sports apparel, but that is made only in Italy. A fabric that optimally interacts with the human body. It is not a barrier, but rather a "second skin" able to ensure proper insulation and manage sweat wicking.

"Innovative Solutions for Sports" is what the acronym and name SIXS stands for, so it is easy to guess how much innovation and research into the development of this product are deeply rooted.

Everything began with six simple products and no expensive advertising campaigns, but rather only the certainty of the quality and effectiveness of this Italian-made excellence. In just two years SIXS became a brand distributed in over 1,000 points of sale throughout Italy simply by offering field tests to athletes and retailers.

Growth was non-stop, and the number of items in the catalog rose to over 100. No longer is just technical underwear offered. There are also sports outerwear (Activewear) lines, impact protection (Pro Tech), as well as a Kids line and a full range of accessories. All of this is based on the use of the patented fabric that makes SIXS items incomparable in terms of quality and effectiveness.

WHAT MAKES US UNIQUE?

Those who still haven't had the pleasure of personally trying on a SIXS garment often ask themselves: "What is so special about these products?" The answer is very simple: it is called **Original Carbon Underwear®** and it is the patented fabric that makes our garments unique.

The result of years of research, the precise blend of technical fibers and distinctive weaving stitch ideally come together to create a fabric designed to help athletes attain a level of comfort never before experienced during their sports activities.

The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete **correct thermal insulation and optimum breathability under all conditions.**

The structure of the fabric just described can be achieved only by combining the weave stitch with technical fibers, and this is why SIXS products are hard to copy.

The low density zones are created by using **carbon fiber** that not only is extremely hard-wearing and ultralight, but also boasts an enormous thermal insulation capacity (it is, in fact, commonly used in spacesuits). Its fineness in the form of textile fiber, which makes it practically invisible to the human eye, creates those micro cavities that channel sweat to the outside so the skin is left dry.

The polypropylene, polyamide fiber and polyurethane fiber, complete the blend and add essential characteristics such as: thermal insulation, water-repellency, bending and wear resistance, stretch and non-deformability.

100% MADE IN ITALY

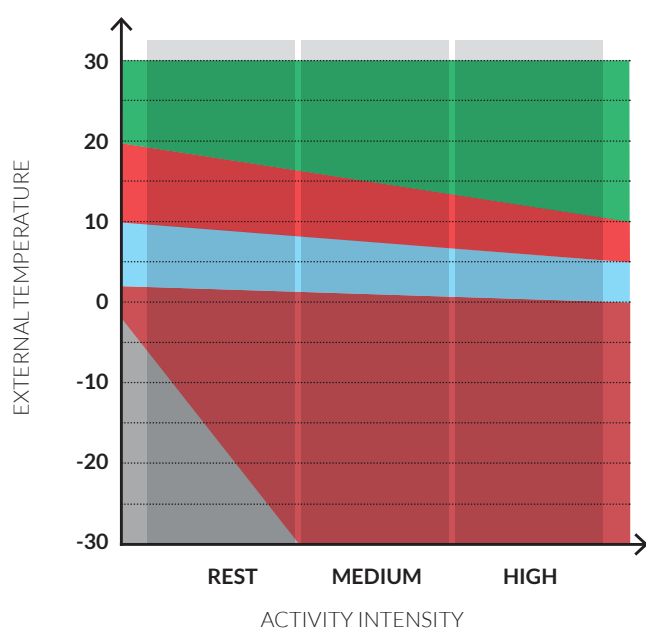

We are proud to boast **100% Italian design and production** that represent a guarantee of a **high quality product**. This also allows us to constantly make progress as we can quickly adapt to the technical evolution of the market.

TEMPERATURE AND INTENSITY

The two main factors that determine the choice of one product over another are the level of physical activity (such as intensity of effort) and the temperature of the environment in which the product will be used.

TO UNDERSTAND THE RECOMMENDED USE OF SIXS BASE LAYER PRODUCTS, YOU CAN REFER TO THIS CHART:

COMFORTABLE SITTING

AGILE PAD

2
DENSITY  **3h**

Medium-density butt-patch that is comfortable and versatile for all uses. It is designed for short to medium distances (up to 3h of non-stop pedaling).

It boasts a thin design to take up minimum space, is very flexible, and it has a double padding layer (4 mm thick in the outermost part, while the center zone arrives at 8 mm) to guarantee adequate shock absorption for road cycling and outdoor activities.

MOTORCYCLE PAD

2
DENSITY  **4h**

Revolutionary double density butt-patch specifically researched for motorcycling. Its peculiar shape covers precisely the zones subject to vibrations and chafing. Made up of a base 4 mm thick (density of 40 kg/m³), on which the 90 kg/m³ inserts are fitted to protect the ischial zone (6 mm thick) and the leg area (3 mm thick). Breathable butt-patch for first-rate comfort during long trips astride the motorcycle.

This pad is developed for an "Adventure" riding position where the knee drops over the seat and below the hip joint. This riding position places additional weight bearing and pressure in the area of the inner thighs/upper groin. The MOTORCYCLE PAD is optimized to reduce chafing in this area.

UNDERWEAR LIGHT

BREEZY TOUCH

THE MOST ADVANCED TECHNICAL UNDERWEAR EVER

Designed for performance at high temperatures, the renewed UNDERWEAR LIGHT line becomes BT: **Breezy Touch**, like the *touch of freshness* that you feel wearing it.

It is in fact made with **the lightest fabric ever tried in a SIXS product**: 40% + light than the 4 Seasons Underwear fabric and 27% of the previous Light line to offer even higher breathability.

EVEN MORE LIGHT AND BREATHABLE

The products of the SIXS Underwear Light line are suitable for all sports undertaken in **high temperature conditions**.

Worn in direct contact with the skin and underneath normal sports clothing, these garments keep the skin always dry because they eliminate moisture and the consequent feeling of dampness. Now thanks to the Underwear Light line underwear will no longer be an optional, even on muggy days. **By avoiding sudden chills** (due to sweat or damp fabric in contact with the skin), **comfort will always be guaranteed while considerably reducing muscle injuries**.

20% MORE BREATHABLE

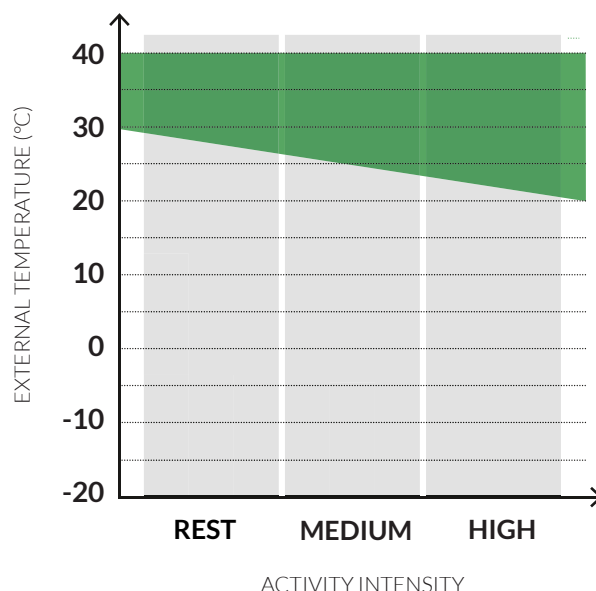

27% LIGHTER

CONSTANT THERMOREGULATION

FAST DRYING

MESH SLEEVELESS JERSEY

For those who need minimal, fresh and lightweight clothing.

GRID-TECH technology: prevent annoying chafing and create cushions of fresh air that reduce the sensation of the skin “suffocating” under the garment.

The polyamide fiber with its extremely low specific weight is able to absorb the skin’s moisture to leave it fresh and dry.

CARBON UNDERWEAR LONG SLEEVE TURTLENECK JERSEY WITH ZIPPER

SIXS Carbon Underwear long sleeve turtleneck jersey with zipper is breathable and insulating in any weather conditions. The long sleeve hugs every part of the arm, to keep the skin feeling fresh, and lies between the skin and a top garment. It also offers some protection against cool drafts if a short sleeve top garment is worn. The turtleneck collar, which can be opened using the handy front zipper, protects the throat from sudden temperature changes and cool drafts.

WIND SHELL

WIND PROTECTION ACCORDING TO SIXS

Acting on the need to provide increased protection from air in the front zone of the body, we have inserted the exclusive **AIR SHIELD** system into several products. It is an extremely effective windproof protection without

membrane, to maintain a very high degree of sweat wicking, in this way preventing the classic "greenhouse effect".

SHORT SLEEVES WINDSHELL JERSEYS

Short sleeve jerseys with windproof WindShell Carbon Underwear protection, ideal for outdoor sports.

SIXS Air Shield technology protects the torso from cold air in the front. A thin layer of breathable windproof fiber creates a micro air cushion that protects the body without causing the classic “greenhouse effect” that increases perspiration.

The rest of the product is in SIXS Carbon Underwear fabric, breathable and thermoregulating in any weather condition.

UNDERWEAR WARM

NEW WARM, NEW ERA

SIXS introduces **COPPER** in its winter product range for the first time, creating the BlazeFit fabric. An element known for its **high thermal conductivity** and for its **antibacterial properties**, in this new fabric with a more consistent texture it helps to **accelerate the evaporation process of sweat**, reduces the moisture of the skin and keeps the body **temperature constant**.

Furthermore, thanks to its structure, copper maintains a constant efficacy over time even after many washes.

CONTROL WINTER

The garments in the SIXS Underwear Warm CU line are suitable for all sports undertaken in **harsh temperature conditions**.

Worn in direct contact with the skin and underneath normal protective sports clothing, these garments keep the body temperature properly regulated and the skin always dry, because they eliminate moisture and the consequent feeling of dampness.

Why wear 3 or 4 layers when you can feel at the right temperature by just using the Underwear Warm line garments with your outerwear?

Changes in temperature will no longer be a problem either. **By avoiding sudden chills** (due to perspiration or damp fabric in contact with the skin), **comfort will always be guaranteed while considerably reducing muscle injuries**.

KEEP WARM

ALWAYS DRY

CONSTANT
THERMOREGULATION

WINTER BLAZEFIT
UNDERWEAR JERSEYS

Designed for low temperatures (below 5 ° C), they allow the athlete not to waste precious energy to warm the body.

In these conditions, it is essential to wear an “enhanced” product that manages the body temperature by conveying any sweat to the exterior without absorbing it.

MERINOS WOOL

THE SECRET FORMULA

After the huge success of the two models of socks (LUXURY MERINOS and ARROW MERINOS) whose composition included merinos wool, we decided to expand the range of products by creating a special line: MERINOS WOOL.

Specific winter line with wool thermal regulation properties, which are superior to any other natural fiber and therefore acts in an excellent way as a barrier against the cold!

POSITION OF MATERIALS

We wanted the comfort of the product when worn to be the same as that of the other products making up the SIXS catalog.

For this reason we decided to put polypropylene inside, in direct contact with the skin, and keep the merinos wool (known to be a bit rougher and bristlier than other yarns) outside.

The wool has heat regulation properties that are superior to any other natural fiber, and it acts as a barrier against cold.

Polypropylene, on the other hand, is a hydrophobic yarn, meaning it does not absorb liquids and optimally manages perspiration.

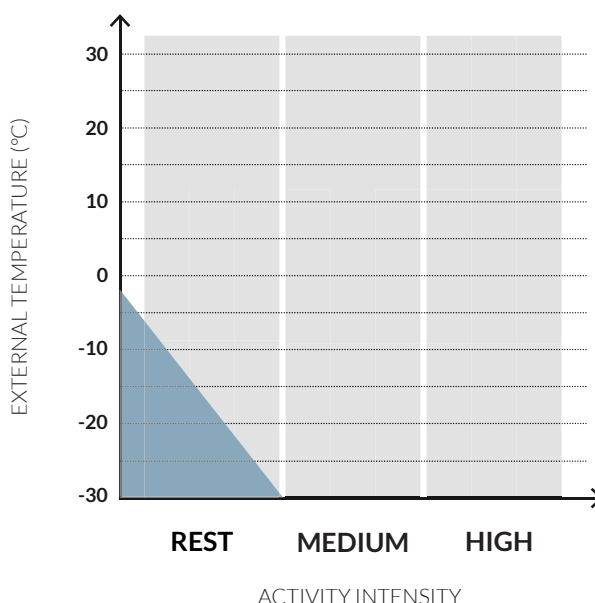

Finally, carbon helps regulate heat, improves body microcirculation, and is bactericidal (fights bad odors) and antistatic.

CONSTANT THERMOREGULATION

EXTREMELY LIGHT

CARBON MERINOS WOOL BASELAYERS

Extremely versatile, sober look, comfortable to wear. Ideal for use as baselayer or an intermediate layer at low temperatures.

Although the weight of the fabric is decidedly low (only 164g/m²), merino wool acts as a natural barrier against the cold.

Placing it outside the tissue, we have eliminated the classic problem of itching; the layer of polypropylene in contact with the skin avoids the accumulation of sweat, giving unparalleled comfort.

YOU

WINTER TOURISM

BRAVE THE COLD

When you're freezing and perspiring in turn, try out the products of the Winter Tourism line. They are designed to offer you warmth and comfort without sacrificing breathability.

THE DIFFERENCE LIES IN THE BLEND

The garments of the Winter Tourism line are the first where the patented SIXS fabric is used together with different textile elements. It is, in fact, the blend of materials that offers the possibility to get perfect protection from cold air, combined with complete moisture-wicking away from the skin. To get top performance, we recommend using SIXS Underwear products underneath the Winter Tourism garments.

- Winter Barrier
- Micropile / Micro Polar Fleece
- Carbon Underwear®

SECOND LAYER

MIX OF FABRICS

BREATHABLE AND THERMOREGULATING

JERSEY WIND STOPPER

Comfortable, lightweight and with a sober and elegant look: the new windproof jersey of the Winter Tourism range are updated in materials and lines, but without losing their meaning.

To be used instead of the classic quilted jacket, present in all touring jackets.

Thanks to the positioning of three different materials, they protect from wind and cold, maintaining a correct thermoregulation, and sweat management thanks to Carbon Underwear inserts.

SOFTSHELL SECOND LAYER

The WINDSHELL Jersey is a second layer to wear on a motorcycle, for those who are looking for a garment that lends itself to racing more than the WTJ SIXS.

Made from breathable polypropylene enhanced with 3D-insert technology in the areas most prone to sweating, so as to promote the expulsion of moisture and body heat. On the front is a membrane to shield against the wind and repel water, to protect you against cold gusts of wind.

Seamless technology, with no seams against the torso, means perfect adherence and wearability, without irritating contact points.

WIND STOPPER LONG JOHNS

The WTP Long Johns represent the new benchmark in the fight against cold. Using Brainy Position technology, three different materials are combined to form this product. The Winter Barrier (windproof and water-repellent fiber) protects the front part of the body, which is exposed to cold air, to keep the cold from penetrating and to keep the body warm and dry. In the areas more subject to perspiration, Carbon Underwear® fabric guarantees total breathability and thermoregulation, while a micro polar fleece weave warms and maintains the right body temperature in the intermediate areas. Recommended as the “intermediate layer” to be used on top of SIXS Underwear and underneath another technical outerwear garment.

COMFORT AND PROTECTION HAVE A NEW NAME

The introduction of SAS-TEC protectors to the range of SIXS products brilliantly satisfies the need for **safety and freedom of movement in all sports.**

Practical housings hold the protective elements, which are perfectly positioned at the crucial points of the body. The **protectors** are in turn soft and comfortable,

but instantly **become stiff and protective when they are needed.**

These features, along with the standard thermoregulation and breathability of SIXS products, make the garments in the Pro Tech line an excellent solution for anyone looking for a single product offering both comfort and protection.

TECHNOLOGICAL INNOVATIONS

Materials unique on the protection scene, which combine chemistry and advanced engineering to obtain a **top performing impact absorption system.**

In normal conditions, the molecules flow freely to allow the material to remain soft and pliant, but at the moment of impact they lock together to absorb the shock and abate the force transmitted. Afterwards the molecules immediately return to their pliant state.

The abdominal band with Velcro closure keeps the back protective armor firmly in place on the athlete's back.

The elastic band with Velcro closure on the elbow makes sure that the protector always stays stable and properly positioned, even if subjected to intense stresses.

Chest armor is easy to adjust on the jersey with the aid of the Velcro fastening, so its position can be adjusted according to other protectors.

The pockets are painstakingly sewn around the protectors to secure them in the right position.

THE CHOICE IS UP TO YOU

Pro Tech line products can be purchased "**bare**" (meaning without protectors) or in the "**KIT**" version (complete with protectors). The KIT lets the athlete purchase just one bundle of protective elements and use them inside other products in the Pro Tech range.

**PROTECTION
WHERE IT
IS NEEDED,
WHEN IT IS
NEEDED**

PRO-TECH

MESH SLEEVELESS JERSEY WITH SPINAL PROTECTION

Mesh sleeveless jersey, ready for insertion of spinal protection. The customer can choose between the CE approved back protective armor level 1 (PRO BACK LIGHT by SAS-TEC) or level 2 (PRO BACK CE2 by SAS-TEC). Perfect for warm days when you want to have just the bare minimum, but you don't want to go without protection. Thanks to GRID-TECH technology, the mesh lies between the skin and the clothing on top, to prevent annoying chafing and create cushions of fresh air that reduce the sensation of the skin "suffocating" under the garment. The polyamide fiber with its extremely low specific weight is able to absorb the skin's moisture to leave it fresh and dry. The back of the sleeveless jersey is in "mesh", so that the rear pocket, where the back protective armor will be inserted, can be fastened.

REINFORCED CARBON UNDERWEAR PROTECTIVE JERSEY

Jerseys with full-length zipper, made of Reinforced Carbon Underwear material: the Carbon Underwear fabric has been reinforced to guarantee the same breathability and insulating features as our Underwear, but with increased density to bear the weight of the protectors and keep them firmly in place. Protections can be integrated as needed (products have the predisposition).

The back protective armor is fastened to the sleeveless jersey with a back pocket stitched at the top, but raised off of the center zone of the back to offer enhanced ventilation, and an abdominal band with Velcro closure that holds it in position. The ventilated chest protective armor (CE approved) is easy to adjust and remove using the Velcro closure. Product compatible with any type of Neck Brace.

PROTECTIVE ELBOW GUARDS

Elbow guard made of Polyfiber Cover to achieve optimum breathability and thermal insulation, with inside pocket for inserting the protective element.

The pocket prevents the protector – which, after being heated by the body’s heat, precisely follows the anatomy of the joint – from moving.

After a few minutes you forget you are wearing it, but, in case of impact, the protector stiffens and protects against impact.

KIDS

FOR TOMORROW'S CHAMPIONS!

Here is enhanced comfort and safety for children up to the age of 12, too. Whether they are just starting out on a stupendous sports career or are taking up weekend challenges with their friends, the patented Carbon Underwear® fabric will help them maintain the right body insulation and temperature. This means fewer colds, sore throats and flu. In short, it is a big help when it comes to their health!

FROM AGE 4 AND UP

We are the first to offer children the same solutions that win over athletes around the world. Our products come in the sizes of 4 to 12 years of age.

Since it is their growth period, the fantastic stretch of the fabric ensures a longer lifetime than would be expected. Indeed, it will not be necessary to change the product every year, much to the joy of the parents!

**WE FULFIL
THE DREAMS OF
LITTLE ATHLETES**

4 SEASONS KIDS CARBON UNDERWEAR JERSEYS

Products for children from 4 to 12 years of age: multi-sport garment, ideal on all occasions.

Skin that is always dry and fresh during competition and training in any sport.

The lightest and most breathable polypropylene fiber on the market combined with a real carbon yarn that provides heat transmission and antistatic properties that protect the body from the electric charge caused by rubbing multiple synthetic fabrics against each other (condition typical of sports clothing).

Tight fit for wearing underneath outerwear.

KIDS CARBON UNDERWEAR ONE-PIECE UNDERSUIT

The SIXS Carbon Underwear one-piece undersuit for children from 6 to 12 years of age. It is the sports underwear garment that any motorcyclist wearing a leather suit absolutely needs in his wardrobe.

Not only does it make putting on outerwear like a one-piece leather suit easier, but the SIXS Carbon Underwear® fabric offers natural thermal insulation and protects the skin from the build-up of perspiration, even in the hottest periods of the year. So there are no more unexpected chills or cold, since moisture will be far away from the body. This product can also be used for other sports activities demanding a single outerwear garment (such as a skindiving wetsuit, or under a one-piece ski suit).

COMPRESSION

**BETTER BLOOD
CIRCULATION MEANS
BETTER PERFORMANCE**

PRINCIPLE OF OPERATION

With their special **variable density** weave, SIXS Compression products compress the muscle fibers in just the right points to **assist blood circulation** and therefore **tissue oxygenation**. It is like having muscles that are constantly massaged throughout their performance.

Like for all SIXS items, also in this case the yarns used are the result of painstaking technological research, are of top quality and foster breathability by helping eliminate sweat from the skin, thus preventing annoying irritations.

WHEN TO USE THEM

The term "performance" does not refer just to racing efficiency. The compression garments offer several **benefits even before start**. They improve blood circulation, **which warms up the muscles faster**. Graduated compression on the limbs also encourages and increases the venous return to the heart and lymph nodes.

There are **a number of benefits** also during the race. First of all, **they considerably reduce muscle damage** (micro-lesions of the fibers) by containing the muscle during activity. This also leads to less swelling after activity, and reduces the possibility of accident and tiredness.

They are essential for **recovery** right after a performance, race or workout. In fact, it is natural that when circulation is stimulated inside the fibers, **muscle fiber recovery and repair time is shortened**.

Then inevitably the compression **increases performance**. By reducing the vibrations of the muscle (main source of fatigue), compression garments lead to greater resistance and strength, and a lower average heart rate.

EVERY DAY

The benefits of the SIXS compression products can also be appreciated in **everyday activities**, such as during long periods of inactivity. When we are forced to stand still or remain seated for a long time, they protect against DVT (Deep Vein Thrombosis) by increasing blood circulation through venous return and reducing swelling in the ankles and legs.

COMPRESSION CALF BAND AND RECOVERY SOCKS

Class 2" compression products. With its special variable density weave, it compresses the muscle fibers in just the right points to assist blood circulation and therefore oxygenation of the tissues. This prevents lactic acid from accumulating in the calf muscles, which delays fatigue and drastically reduces recovery time.

It can be used before starting the activity to quicken the warmup, during the activity to enhance performance, or right afterward to reduce recovery time. The polyamide yarn used, thanks to its parallel construction, guarantees breathability and sweat wicking.

SOCKS

TO EACH HIS OWN

Socks are a fundamental element in completing sports clothing. Weather conditions, the sport played and appearance are all variables that make the choice of socks subjective and extremely important.

We are proud to be able to offer multi-sport products dedicated to cycling and motorcycling in our SOCKS range. Quality, design and attention to the finest detail ensure that once you have put on a pair of SIXS socks you will fall in love with them.

Fabrics and technologies specially designed to make these products the best on the market: seamless design with no pressure points. Moreover, the **BreathFit Socks** fabric does not retain perspiration and always leaves the skin dry, in this way preventing bacteria and irritations from proliferating.

COMFORT AT YOUR FEET

BREATHFIT SOCKS

BreathFit fabric socks: thanks to the polypropylene fiber, the skin is always dry and wrapped so that unpleasant odors and annoying irritations due to an accumulation of perspiration and friction do not form.

LONG SOCKS

Below-the-knee long socks made of BreathFit Socks® fabric allow the athlete's feet to stay dry all the time, thanks to the patented SIXS technology.

Protecting the skin from an accumulation of perspiration also means eliminating unpleasant odors. Furthermore, the seamless design and comfortable cuff on the calf make this product particularly comfortable and high performing.

HI-PERFORMANCE LONG SOCKS

Below-the-knee long racing sock developed for those who want maximum sensitivity on the bike's foot pegs on track. Minimal, light and breathable: its micro-mesh textile weave allows excess heat to be dissipated in the boots.

Sponges are located at pressure points, to increase comfort while driving.

Feet stays dry all the time, thanks to the patented SIXS technology. Protecting the skin from an accumulation of perspiration also means eliminating unpleasant odors. Furthermore, the seamless design and comfortable cuff on the calf make this product particularly comfortable and high performing.

LONG MOTORCYCLING SOCKS

Stretch socks with a multilayer structure to enhance the foot's comfort inside motorcycling boots.

Large protective and absorbent terrycloth inserts on the front (tibial zone), on the toe and on the heel, and protection for the Achilles tendon.

In addition to soft ening blows and vibrations, the terrycloth increases the rubbing resistance of the sock in the susceptible areas. Ribbed construction to improve the adherence and stability of the sock on the foot.

Suitable for both warm and cold seasons.

LONG MOTORCYCLING SOCKS

SIXS motorcycling socks allow the athlete's feet to stay dry all the time, thanks to the reinforced BreathFit Socks® fabric.

Protecting the skin from an accumulation of perspiration also means eliminating unpleasant odors.

The seamless design, the anti-torsion elastic band on the foot and ankle, and the abrasion-proof reinforcement on the shin and instep make this product particularly comfortable and high performing, even inside motorcycle boots.

Great for both the hot and cold seasons.

OFF-ROAD MOTORCYCLE SOCK

The long (above-the-knee) sock, developed by SIXS for use with O²-Road knee guards, is back. Improved fit, a seamless design, the anti-torsion elastic band on foot and ankle, and the abrasion-proof reinforcement on the shin and instep make this product particularly comfortable and high performing inside boots.

The reinforced BreathFit Socks® fabric also allows the athlete's feet to stay dry all the time by protecting against a build-up of perspiration, and hence the formation of unpleasant odors.

SHORT MERINO WOOL SOCKS

These socks are incredibly comfortable and specific for the winter season. The elastic fiber hugs the entire foot and runs all the way down the sock to provide light pressure.

Added to it is merino wool, with its very high insulating capacity, and polypropylene, which increases its abrasion resistance.

FEATURES

LONG MERINO MOTORCYCLING SOCKS

Socks designed for winter use in motorcycling footwear.

Fabric made of polypropylene is in direct contact with the skin (for optimal management of perspiration) and Merino wool in the high exposure points (to act as a barrier against cold and to absorb stresses and impacts).

The product is constructed using an elastic filament running down the length of the sock, so as to allow it to rest on the entire leg and prevent the sock from moving while riding.

RESOLVWEAR

Washes, regenerates and sanitizes all types of technical sportswear and accessories in synthetic and natural fibres.

Designed to be effective on typical sports dirt at low temperatures (30°).

Removes unpleasant odours and gives a particular fragrance which remains for a long time with deodorant effect.

AVAILABLE IN 3 SIZES:

- 5l tank for 100 washes (ideal for professional use)
- 1l bottle for 20/25 washes (for normal washing machine use)
- Portable “travel” 100ml bag for 2/3 washes, also convenient in hotels and accommodation facilities

AVAILABLE IN 2 FRAGRANCES:

- **FRAGRANCEX**
The famous original fragrance of SIXS garments, developed in collaboration specifically to renew the fragrance at each wash and enriched with molecules that keep the technical fibres soft and intact without using fabric softener and which reduce the formation of bad smells during wearing.
- **RESOLVWEAR FRAGRANCE ACTIVE**
Intense fresh and menthol perfume, gives the composition an energizing tone, full of vitality.

SUGGESTIONS FOR USE:

- To wash in the washing machine: use a specific program for sportswear at 30°. Depending on the degree of dirt choose a more energetic and longer program in the case of difficult dirt or a lighter and faster program in the case of light dirt
- Hand washing: dilute in lukewarm water, leave garments to soak for 30 minutes then rinse thoroughly
- In case of stubborn stains apply a few drops of product directly on stains before washing
- Dry in the shade and away from heat sources

TECHNICAL SPECIFICATIONS:

- Specific product for synthetic fabrics and micro-fibres, maintains the fibres soft and protected
- Contains “Colour Saver”: respects and maintains the original colours of the technical garments
- Do not add fabric softener (it clings to the fabrics and is therefore in contact with the skin and could cause skin reactions)

FIT/SIZES

SIXS clothing is designed to fit the athlete's body snugly, like a second skin, enveloping and protecting it without applying too much pressure.

Owing to the extraordinary stretch of the Carbon Underwear® fabric and the outstanding fit, choosing the right size allows for a considerable tolerance. In any case, if you have never worn SIXS, we recommend that you stop in at an authorized reseller to ascertain your correct size.

SIXS products are technical items, and are not suitable for casual use.

L	22-24 cm	9ft - 9.4ft
XL	>24 cm	>9.4ft

TECHNOLOGIES

COMPRESSION TECHNOLOGY

Graduated compression to stimulate oxygenation and blood circulation, which help recovery and boost power

INTELLIGENT SAFE PROTECTION

Thanks to the special impact-sensitive protectors, the product is soft and pliant, so it perfectly adapts to the body's anatomy. The protectors stiffen at the time of impact and absorb the force of impact

HYDROPHOBIC WEAVE

It carries moisture to the outside so it can evaporate. The skin is always dry and thermal insulation is constant

PLUMA INNOVATION

Ultra-light product

ANTIBACTERIAL FIBER

Polypropylene fiber prevents foul odors and annoying irritations due to build-up of perspiration and chafing from forming

ANTISTATIC SYSTEM

The carbon yarn isolates the static electricity caused by the rubbing of fabrics

SEAMLESS TECHNOLOGY

Less seams for an absolute comfort

3D TECHNOLOGY

3D honeycomb structure

SPF 50

Sun Protection SPF 50+

MERINO WOOL

Product containing merino wool

BRAINY POSITION

Mix of breathable and windproof fabrics positioned at optimal areas to ensure product functionality

CUSHION

Cushioning pads

WATERPROOF PRIME

Waterproof and breathable product

HIGH VISIBILITY

Reflecting inserts for maximum visibility

GRID-TECH

Very high level of breathability owing to the large mesh structure

AIR SHIELD

Breathable windproof protection

MATERIALS

WINTER BARRIER

Bonded fabric consisting of an outer windproof layer and synthetic fleece on the inside. It provides a barrier impervious to cold air and is warm and soft in contact with the skin.

- airtightness < 8 mm/sec
- breathability < 18 m²Pa/W

CARBON MERINOS WOOL

The polypropylene layer in contact with the skin prevents accumulation of perspiration, providing unmatched comfort. The merino wool is properly placed in the outer layer to act as a barrier.

- breathability < 6 m²Pa/W

THERMOPILE

Fabric 150 g in weight, 100% polyester: extremely warm in contact with the skin, soft, and with outstanding anti-pilling properties.

TD SHIELD

Windproof and water-repellent polyester membrane.

- waterproof: > 10,000 mm water column
- breathability < 18 m²Pa/W
