ZCBB
braking pads

*precio por disco o pinza (IVA no incluido)

CARACTERÍSTICAS

Las Pastillas de freno ZCOO son sinterizadas cerámicas.

Con los materiales y el proceso de fabricación utilizados, ZCOO ha conseguido que las pastillas se mantengan totalmente planas al entrar en contacto con el disco, aun estando sometidas a las altas temperaturas que se generan en las frenadas extremas.

Esta característica hace que las pastillas de freno ZCOO no disminuyan su rendimiento, sea cual sea la temperatura de funcionamiento, disponiendo en todo momento de una potente frenada y siempre con el mismo tacto en la maneta.

Además, las pastillas de freno ZCOO forman una cobertura de cerámica en el disco que lo lubrica, prolongando así su vida útil.

COMPUESTOS

Las Pastillas de freno ZCOO se fabrican en dos compuestos, EX y EXC.

Con el compuesto EX se consigue una mayor dosificación del freno y con el compuesto EXC se obtiene una frenada muy fuerte con menor recorrido de la maneta que con el compuesto EX.

La duración de las pastillas con el compuesto EXC es muy superior a las del compuesto EX.

En cualquier caso, ambos compuestos tienen la misma potencia de frenada. En ambos casos, el tratamiento cerámico evitará el desgaste prematuro de los discos prolongando así su vida útil.
