 All GALFER products (discs, pads and brake lines) are designed and manufactured in our 6000 sq. meters factory at Granollers (Barcelona), next to the Circuit de Catalunya.

The production process begins in the R&D Department, responsible for launching new products. The materials are developed in our laboratories and then chemical and physical tests are conducted. Once this phase is completed and to determine their going into production further tests are conducted on a vehicle. The Department of Methodology designs the production processes with the Engineering Department. Finally, the Quality Department certifies the quality and reliability of our products according to ISO standards.

We are members of the FEMFM (Federation of European Manufacturers of Friction Materials), and we have worked together for the European Quality Manual of disk pads, drum brake calipers and clutches.

 Todos los productos GALFER (discos, pastillas y latiguillos de freno) se diseñan y se producen en la fábrica de Granollers (Barcelona), unas instalaciones de 6000 m2 situadas al lado del Circuit de Catalunya.

El proceso productivo se inicia en el Departamento de I+D+i, que se encarga del lanzamiento de nuevos productos. Nuestros laboratorios desarrollan los materiales y los someten a pruebas químicas y físicas. Superada esta fase, se realizan las pruebas sobre el vehículo para determinar el paso a producción. El Departamento de Metodología diseña los procesos productivos en conjunción con el Departamento de Ingeniería. En último lugar interviene el Departamento de Control de Calidad, que certifica la calidad y fiabilidad de nuestros productos siguiendo las normas ISO.

3 HOMOGENEOUS BRAKE PADS WEAR

The same contact surface between pad and disc during each turn generates a regular wear out of the brake pads and an homogeneous pressure.

4 DYNAMIC UNBALANCE DECREASE

Having less unsprung mass reduces the gyroscopic effect and improves the maneuverability of the motorcycle.

5 STATE OF THE ART TECHNOLOGY

The CUBIQ brake track design is inspired in the latest modern designs and in contemporary elements.

6 NAMED AFTER THE STEEL MOLECULES

The origin of the CUBIQ name comes from the crystal molecules of the steel.
