DP BRAKES

FOR MOUNTAIN BIKES

High performance sintered brake pads for Off-Road mountain bike riders and competitors.

XC PRO

- Engineered to offer superb braking power and feel, while providing long service life.
- Superior braking even in the most adverse weather conditions.
- Virtually no difference between dry and wet braking performance.
- Ultra resistant to contamination from brake fluid.
- Ideal for XC and trail riders wanting excellent performance and long life.

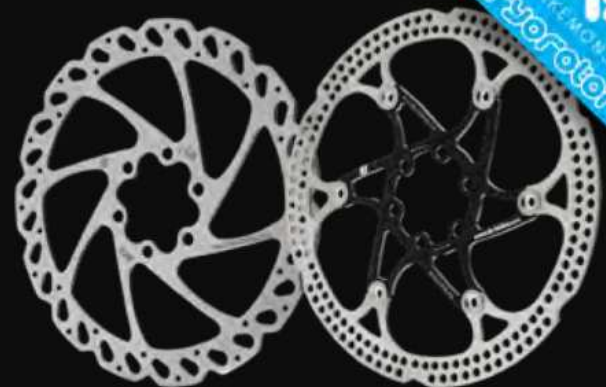

DH PRO

- Ultra-high performance sintered metal disc brake pads.
- Engineered for out-and-out stopping power.
- Superb braking feel, hot or cold.
- One finger braking.
- Resistant to contamination from brake fluid.
- Ideal for DH racers wanting ultimate performance.

XC ECO

- Latest generation of organic fibre compound.
- Progressive feel and rider feedback.
- No rotor wear.
- Quiet operation.
- Ideal for XC and trail riders wanting good all-round performance and value for money, while providing excellent service life.

Processing at -195°C (-319°F) changes the structure of the metal giving a closer molecular bond. This increases wear resistance and gives a longer service life and creates a more stable material with fewer inherent stress points. You can expect a service life up to 3x that of a non-treated rotor and one that copes much better with the hot/cold heat cycle associated with disc brakes.

DP PISTONS

OFF-ROAD BRAKE PISTONS

Enhance your performance with our cutting-edge motocross/enduro rear brake calipers, designed for superior precision and responsiveness.

- Eliminate brake fade
- Eliminate brake drag
- Reduced temperatures
- Reduced pad wear
- Increased confidence
- Decreased lap times
- Castelleate dand drilled for maximum ventilation
- Chamfered to reduce contact patch with heat source
- Diamond burnished and nitron MC coated for a super smooth low-friction surface
- Internal radial cooling fins increase surface area & maximise heat transfer away from the piston
- Keeps brake fluid cool
- Radiused rear cavity to increase surface area and provide more fluid behind the piston

INFORMATION

IMPORTANT NOTES

Street Bikes

Brake pads should be fitted by experienced mechanics in accordance with the motorcycle manufacturer's service manual. New pads require bedding-in (80% contact area) before maximum performance is achieved. This may take up to 150 miles (250kms). Until then use brakes gently, only braking severely in an emergency. Replace pads when thickness of material reaches 2mm.

Aftermarket Discs/Rotors

DP Brakes have been extensively developed and tested for use with original equipment discs/rotors. Advice should be obtained in writing from the company if alternative discs/rotors are intended to be used.

Fitness For Purpose

The DP brake pads listed in this fitments guide are warranted to be of merchantable quality and fit for the purpose they are supplied i.e. motor vehicles as described herein. Advice should be obtained in writing from the company if alternative uses are proposed for the product. All DP Brakes friction material is asbestos free.
